

Even if you're healthy,
if you live with or care
for someone at
increased risk for
serious complications
from influenza,
including seasonal flu
and 2009 H1N1 flu,
(sometimes called
"swine flu") you should
get vaccinated.

Groups at high risk
include **infants** and
pregnant women.

I'll protect my baby.

I'll get my flu vaccines.

Babies younger than 6 months can't be vaccinated against the flu, but they are at high risk for severe complications from seasonal flu and 2009 H1N1 influenza (sometimes called "swine flu").
They rely on *you* to protect them. Get vaccinated.
