

If your kids are a size...

small

medium

large

then they need flu vaccines.

Flu protection is recommended in sizes 6 months through 18 years. Any influenza, including seasonal flu and 2009 H1N1 flu (sometimes called "swine flu") can be a serious disease for children of all ages, causing them to miss school, activities, or even be hospitalized. CDC and doctors recommend flu vaccinations for all children aged 6 months through 18 years.

2009 H1N1 flu vaccine is recommended for all persons aged 6 months through 24 years of age.

Seasonal flu vaccine is recommended for all persons aged 6 months through 18 years of age.
