I'll protect my baby.

I'll get my flu vaccine.

Even if you're healthy, if you live with or care for someone at increased risk for serious complications from influenza, you should get vaccinated. Groups at high risk include **infants** and **pregnant** women.

Babies younger than 6 months can't be vaccinated against the flu, but they are at high risk for severe complications from the flu.

They rely on you to protect them.

Get vaccinated.
