

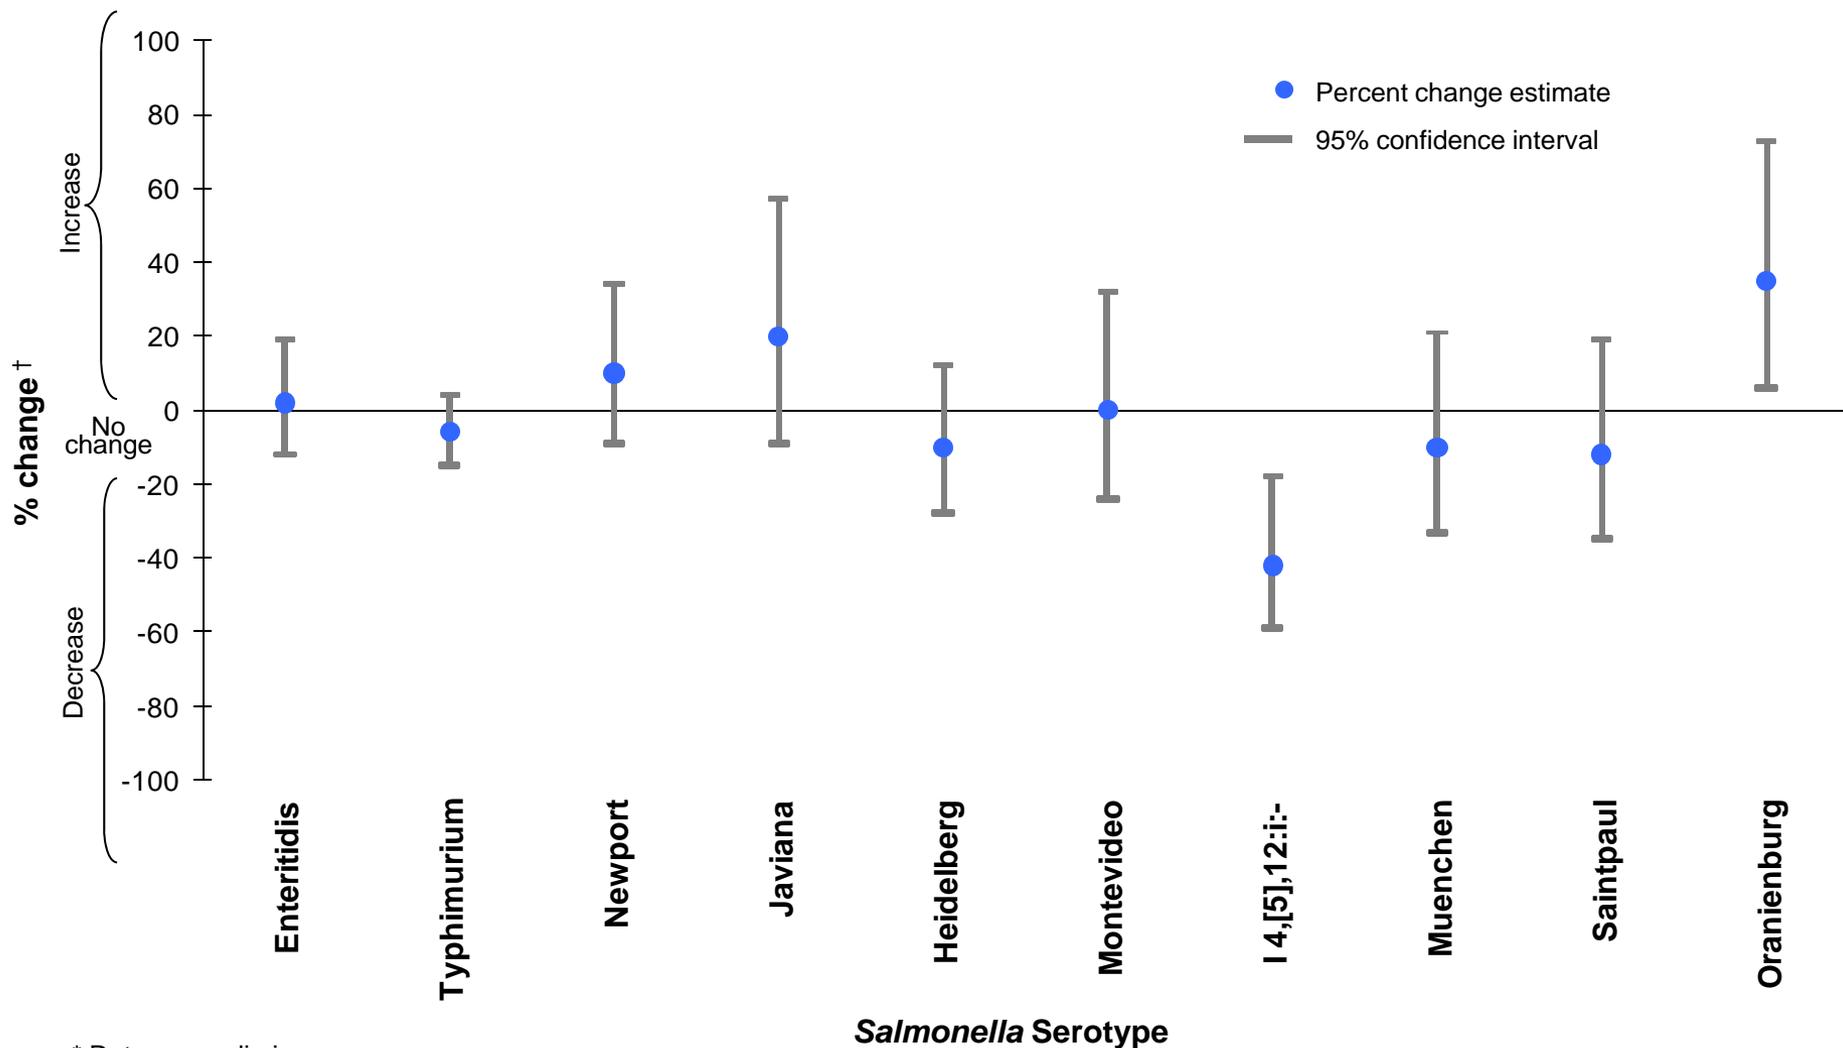

FIGURE 8. Percent change in incidence of laboratory-confirmed *Salmonella* infections with the top 10 *Salmonella* serotypes in 2009\* compared with average annual incidence during 2006-2008, by serotype - Foodborne Diseases Active Surveillance Network (FoodNet), United States

\* Data are preliminary

† No significant change = 95% confidence interval extends both above and below the “no change” line;  
 Significant increase = estimate and entire 95% confidence interval are above the “no change” line;  
 Significant decrease = estimate and entire 95% confidence interval are below the “no change” line.
