## FoodNet Population Survey, 2006-2007

The Foodborne Diseases Active Surveillance Network (FoodNet) is a collaborative network established in cooperation with the Centers for Disease Control and Prevention's Emerging Infections Program (EIP); state health departments in California, Colorado, Connecticut, Georgia, Maryland, Minnesota, New Mexico, New York, Oregon, and Tennessee; the Food and Drug Administration's Center for Food Safety and Applied Nutrition; and the United States Department of Agriculture's Food Safety Inspection Service. FoodNet is a sentinel network producing stable and accurate national estimates of the burden, trends, and sources of foodborne diseases in the United States through active surveillance and additional studies. Enhanced surveillance and investigation are integral parts of developing and evaluating new prevention and control strategies that can improve the safety of our food and the public's health. ([www.cdc.gov/FoodNet](http://www.cdc.gov/FoodNet)).

FoodNet uses information gathered via the FoodNet Population Survey to determine the prevalence and severity of gastrointestinal illness among persons within the FoodNet sites and to summarize information on select exposures. Clearwater Research Inc. administered the 2006-2007 survey via telephone in the ten population-based FoodNet sites from May 2006 through April 2007. The 2006-2007 survey is the fifth cycle in a series of 12-month FoodNet Population Surveys.

FoodNet worked with Clearwater Research Inc. to carry out 2006-2007 FoodNet Population Survey. FoodNet developed and tested the questions included in the study. Clearwater Research Inc. created the survey sample using a modified version of the population sampling scheme developed by the CDC's Behavioral Risk Factor Surveillance Study (BRFSS). The BRFSS scheme produced a probability sample of the non-institutionalized, civilian adults age 18 and older in the household in the target geographic areas. The modified FoodNet sample included all household members regardless of age. The sampling process had two stages. At the first stage, Clearwater Research Inc. obtained the sample of randomly generated phone numbers from MSG/Genesys and used these to select households for inclusion using a disproportionate stratified sample (DSS) design. The DSS random-digit-dialing method used a sample frame that included all telephone numbers serving households in the geographic target areas and divided them into listed and unlisted telephone numbers. To improve the sample efficiency (ratio of sample records to completed interviews), Clearwater Research Inc. oversampled the listed number stratum at a rate of 1.5 times the rate for unlisted numbers. In the second stage, study staff used a computer algorithm, based on the number of females and males in the household, to randomly select one household member for interview.

All age groups were eligible for inclusion. For respondents aged 13 to 17, a parent or guardian had to either grant permission for the interview or agree to respond for the adolescent. For respondents aged 12 years or under, a parent or guardian was interviewed as a proxy to ascertain information about the child's exposure. We restricted the study to persons who spoke English and Spanish.

The total population of ten sites included in the study, according to the 2007 United States Census Bureau estimates, was 45,883,553 persons. From May 2006 through April 2007, Clearwater Research Inc. completed 17,372 interviews. Respondents were randomized into four groups. Respondents in the first and third group (n=8,829) were administered a separate food section from respondents in the second and fourth group (n=8,543). Several food exposures of interest, such as eggs, were asked in both food sections. Finally, respondents in the third and fourth groups were administered the animal exposure section of the questionnaire (n=8,718).

This report summarizes demographic characteristics, food consumption, and animal exposure information collected during the study period, overall and by FoodNet site. The data reported is an average exposure among persons in the seven days prior to interview. Exposures and food preferences may change due to the time of year or among specific age-groups. All frequencies included in this report are unweighted.

## Table of Contents

Demographic Characteristics of Respondents, by FoodNet Site.....	7
Fresh Vegetables Consumed in the Past 7 Days, by FoodNet Site (Food Exposures A).....	8
Fresh Vegetables Consumed in the Past 7 Days, by FoodNet Site (continued).....	9
Fresh Vegetables Consumed in the Past 7 Days, by FoodNet Site (Food Exposures B).....	10
Fresh Herbs Consumed in the Past 7 Days, by FoodNet Site.....	11
Sprouts Consumed in the Past 7 Days, by FoodNet Site.....	11
Fresh Fruit Consumed in the Past 7 Days, by FoodNet Site (Food Exposures A).....	12
Fresh Fruit Consumed in the Past 7 Days, by FoodNet Site (Food Exposures B).....	13
Eggs Consumed in the Past 7 Days, by FoodNet Site.....	14
Unpasteurized Milk Consumed in the Past 7 Days, by FoodNet Site.....	14
Mexican-Style Cheese and Cheese Prepared with Unpasteurized Milk Consumed in the Past 7 Days, by FoodNet Site.....	14
Dairy Consumed in the Past 7 Days, by FoodNet Site.....	15
Cheese Consumed in the Past 7 Days, by FoodNet Site.....	16
Meat and Poultry Consumed in the Past 7 Days, by FoodNet Site.....	17
Beef Consumed in the Past 7 Days, by FoodNet Site.....	18
Cooked or Processed Meats Consumed in the Past 7 Days, by FoodNet Site.....	19
Seafood Consumed in the Past 7 Days, by FoodNet Site.....	20
Dishes Prepared with Raw Fish Consumed in the Past 7 Days, by FoodNet Site.....	20
Dried Food Products Consumed in the Past 7 Days, by FoodNet Site.....	21
Juice Consumed in the Past 7 Days, by FoodNet Site.....	22
Unpasteurized Juice Consumed in the Past 7 Days, by FoodNet Site.....	22
Cereals Consumed in the Past 7 Days, by FoodNet Site.....	23
Baby Food and Formula Consumed in the Past 7 Days, by FoodNet Site.....	23
Mexican-style Food Products Consumed in the Past 7 Days, by FoodNet Site.....	24
Processed Food Products Consumed in the Past 7 Days, by FoodNet Site.....	24
Store-bought, Prepared Foods Consumed in the Past 7 Days, by FoodNet Site.....	25
Frozen Foods Consumed in the Past 7 Days, by FoodNet Site.....	26
Foods Consumed in Commercial Establishments in the Past 7 Days, by FoodNet Site.....	27
