Funding Opportunity Announcement CDC-RFA-GH16-1619

Supporting the Implementation and Expansion of High Quality, Sustainable and Comprehensive HIV Prevention, Care and Treatment Programs in the Western Region and Turkana County of the Republic of Kenya under the President’s Emergency Plan for AIDS Relief (PEPFAR)

| | Question | Response |
|----|---|---|
| 1. | What remains is the issue related to the health facilities/sites and sub counties which are currently being supported partially through the USAID partners. Are all the facilities in these counties factored in this FOA or we leave out the ones supported by USAID partners? | Please see the site list beginning on page 3 of this document |
| 2. | Can CDC please confirm that the funding levels listed in the FOA both ceiling and approximate average award are annual (yr1) funding amounts? In addition, would CDC be willing to share approximate funding levels by County? | Funding levels listed in the FOA for Award Ceiling and Approximate Average Award are estimated year 1 funding amounts. CDC does not have approximate funding levels by county. |
| 3. | Can CDC please share the specific sub-counties that will be covered under the project across the six focus counties? For example, will this project’s support be limited to sub-counties currently supported by CDC or will it include all sub-counties in each county? | This FOA is intended to support work at the facilities on the site list. |
| 4. | Are applicants required to submit a separate application for each county? | Applicants are not required to submit separate applications for each county in this FOA CDC-RFA-GH16-1619. |
| 5. | Can CDC please provide their vision for coordination and collaboration between CDC-RFA-GH16-1716 and CDC-RFA-GH16-1619 given the shared geographic focus and focus on key and priority populations. | Awardee(s) of CDC-RFA-GH16-1619 will primarily focus on provision of HIV clinical treatment and prevention through facility-based services. Awardee(s) of CDC-RFA-GH16-1716 will focus on HIV prevention services through a community-based response. CDC expects the awardee(s) will collaborate to maximize linkages across programs, and to ensure no duplication of service provision within the shared geographic focus areas. |
| 6. | The FOA includes a requirement for the submission of a Data Release Plan with the application in accordance with the CDC Policy on Releasing and Sharing Data. The referenced policy defines data as “scientific records” and in the section on the obligations of grantees, contractors and partners reference is made to researchers. As this application is for a non-research program can | That is correct, this is a non-research program. The requirement to submit a Data Release Plan will apply when research is conducted, in accordance with the policy. |

Questions and Answers – 12/19/2015

Funding Opportunity Announcement CDC-RFA-GH16-1619

| | | |
|-----|--|--|
| | CDC please confirm if the requirement to submit a Data Release Plan applies? | |
| 7. | Does CDC plan to publish expected outcomes and targets for OVC support under this program? | CDC does not plan to publish expected outcomes and targets for OVC support under this program. |
| 8. | Would CDC consider extending the deadline by two weeks for this FOA to compensate for days lost during the proposal preparation period due to holiday closures of ministry and country offices? | The application deadline date will not be extended due to holiday closures. The FOA was posted on December 4, 2015 and closes on February 4, 2016. Applicants have 62 days to submit applications. During this time period there is 1 public holidays in December in the US and/or Kenya on a business day (December 25) and in January there is 1 (January 1). |
| 9. | In the reporting table summarizing the required reports under this award (pg. 46), there is mention of an Annual Performance Report (APR) that must be submitted 120 days before the end of the budget period; the table indicates that this report will also serve as the yearly continuation application. However, the table also notes that annual reports are due 90 calendar days after the award year. Can CDC confirm whether annual reports under this award will be submitted 120 days before the end of the budget period, or 90 calendar days after the award year? | The Annual Performance Report which serves as the continuation application is a different requirement than the Performance Measure Reporting requirements. The Performance Measure Reporting requirements detailed in c. Performance Measure Reporting are specific to PEPFAR. The APR, serving as a continuation application, is due 120 days before the end of the budget period allowing sufficient time for CDC to make a determination to continue the award based on the evidence of satisfactory progress by the awardee (as documented in required reports), and the determination that continued funding is in the best interest of the federal government. Performance Measure Reporting requirements are necessary for awardees to meet PEPFAR quarterly and annual reporting requirements. The annual reporting requirement for PEPFAR covers a 12 month time period. The performance measures report may contain information previously reported in the APRs. |
| 10. | Would CDC please clarify the Scope of Work for OVC support intended for the above listed grants? | Applicants should respond to the specific outcomes and targets described in the FOA. |
| 11. | Must applicants submit proposals covering the entire geographic region in the FOAs, or can an applicant submit a proposal for activities in select counties within the region covered by the FOAs listed above? | The scope of the application is ultimately at the discretion of the applicant. However, At Phase II Review, objective reviewers assess applications against all of the requirements of the FOA using the phase II review criteria. |
