**Funding Opportunity Announcement CDC-RFA-GH16-1620**

**Supporting the Implementation and Expansion of High Quality, Sustainable and Comprehensive HIV Prevention, Care and Treatment Programs in Faith-Based Organization Facilities in the Republic of Kenya under the President’s Emergency Plan for AIDS Relief (PEPFAR)**

	<b>Question</b>	<b>Response</b>
1.	What remains is the issue related to the health facilities/sites and sub counties which are currently being supported partially through the USAID partners. Are all the facilities in these counties factored in this FOA or we leave out the ones supported by USAID partners?	Please see the site list beginning on page 2 of this document
2.	Considering the approximate number of awards is 1-3, does an applicant have to apply for all the listed counties or can one target some select/preferred counties?	The scope of the application is ultimately at the discretion of the applicant. However, At Phase II Review, objective reviewers assess applications against all of the requirements of the FOA using the phase II review criteria.
3.	For the low burden counties; what is the definition or cut off point/number for “high volume facility”?	There is no defined cut-off point for high-volume facility. For all counties cited in this FOA, please refer to the site list.
4.	The FOA will support implementation and expansion of comprehensive HIV prevention, care, and treatment programs in FBO health facilities in listed counties: would this target every FBO facility in the high burden counties and all high volume FBO facilities in the low burden counties? Or will this be limited to the FBO health facilities currently being supported by CDC?	This FOA is intended to support work at the facilities on the site list.
