

# SAVE THE DATE

Join us for the **63<sup>RD</sup>** Annual Epidemic Intelligence Service Conference  
Featuring

## INTERNATIONAL NIGHT

*Improving Global Health Security through Field Epidemiology Training,  
Surveillance, and Outbreak Response*

**WEDNESDAY, APRIL 30, 2014**

**Atlanta, Georgia**

Master of Ceremonies

**Jordan W. Tappero, MD, MPH**

Director, Division of Global Health Protection, Center for Global Health

Welcome Remarks

**Thomas R. Frieden, MD, MPH**

Director, Centers for Disease Control and Prevention

Administrator, Agency for Toxic Substances and Disease Registry

International Night is one of the highlights of the annual Epidemic Intelligence Service (EIS) conference. It provides a unique forum where FETP residents can formally present how their work helps prevent, detect, and respond to communicable and non-communicable diseases and other health threats. It also gives residents an opportunity to defend their research methodology before a scientific council of peers, and compete to receive the highest FETP honor – The William H. Foege Award for Outstanding Scientific Presentation. International Night creates an environment where FETP residents and EIS officers can meet face-to-face, learn from each other and strengthen a global network that can be called upon to address global health challenges. Since 1980, through the FETP platform, CDC has worked with ministries of health and other partners to strengthen public health capacity by training over 2,800 “disease detectives” from 70 countries. 80% of FETP graduates continue to work in their home countries. With the continued threat and burden of infectious diseases, FETPs also play a significant role in assisting countries in meeting their core capacity requirements for surveillance and response under the International Health Regulations (IHR, 2005).

### Agenda:

5:30 p.m. - Poster Presentations

6:45 p.m. - Photo Contest

7:30 p.m. - 10:00 p.m. - Oral Presentations and Awards
