Evaluating Public Health Programs

LEARNING OBJECTIVES

At the end of the training, you will be able to:

- Follow CDC's framework to evaluate a public health program.

ESTIMATED COMPLETION TIME

- 565 minutes or approximately 9 ½ hours (4 hours, 25 minutes presentation; 5 hours skill assessments)

REFERENCES AND RESOURCES

- MMWR, Framework for Program Evaluation in Public Health, September 17, 1999 / Vol. 48 / No. RR-11, <http://www.cdc.gov/mmwr/pdf/rr/rr4811.pdf>
- U.S. Department of Health and Human Services Centers for Disease Control and Prevention. Office of the Director, Office of Strategy and Innovation. Introduction to program evaluation for public health programs: A self-study guide. Atlanta, GA: Centers for Disease Control and Prevention, 2011.

- Program Evaluation Webinar Series Part 2: *Getting Started and Engaging Your Stakeholders*, Presented by: Leslie Fierro and Carlyn Orians
- Program Evaluation Webinar Series Part 3: Describing Your Program and Choosing an Evaluation Focus; Presented by Thomas J. Chapel, MA, MBA, Chief Performance Officer (Acting), CDC/Office of the Director/OCOO
- Program Evaluation Webinar Series Part 4: *Gathering Data, Developing Conclusions, and Putting Your Findings to Use*, presented by Christina A. Christie, Ph.D., Claremont Graduate University

Slide	Notes
-------	-------

Learning Objective

- At the end of the training, you will be able to follow CDC's framework to evaluate a public health program

Evaluating Public Health Programs

2

Lesson Overview

- Definition and purpose of program evaluation
- Types of program or project evaluation
- Steps in program evaluation
- CDC Evaluation Framework

Evaluating Public Health Programs

3

DEFINITION AND PURPOSE OF PROGRAM EVALUATION

Evaluating Public Health Programs

4

Slide

Notes

What is Meant by Program?

Evaluating Public Health Programs

5

Defining Program Evaluation

- Program evaluation is the systematic collection of information about the activities, characteristics and outcomes of the program to:
 - Make judgments about the program
 - Improve program effectiveness, and/or
 - Inform decisions about future program development

Evaluating Public Health Programs

6

Types of Evaluation

Process

Outcome

Evaluating Public Health Programs

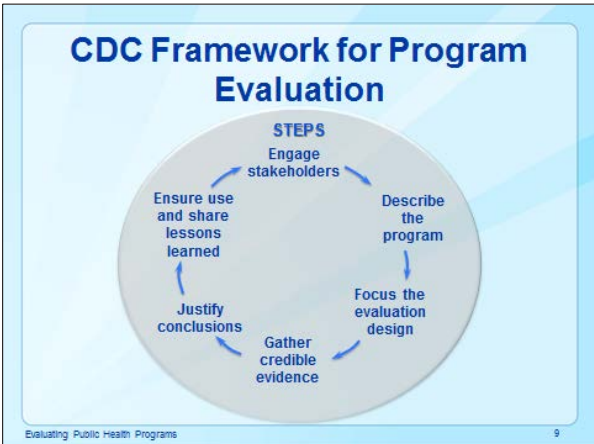

7

Slide	Notes
-------	-------

STEPS IN PROGRAM EVALUATION

Evaluating Public Health Programs 8

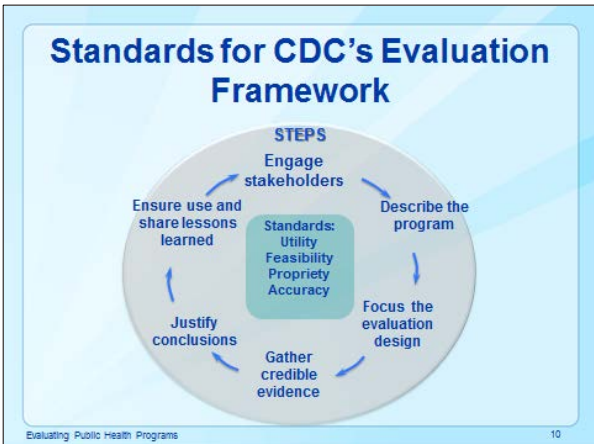

CDC Framework for Program Evaluation

STEPS

- Engage stakeholders
- Describe the program
- Focus the evaluation design
- Gather credible evidence
- Justify conclusions
- Ensure use and share lessons learned

Evaluating Public Health Programs 9

Standards for CDC's Evaluation Framework

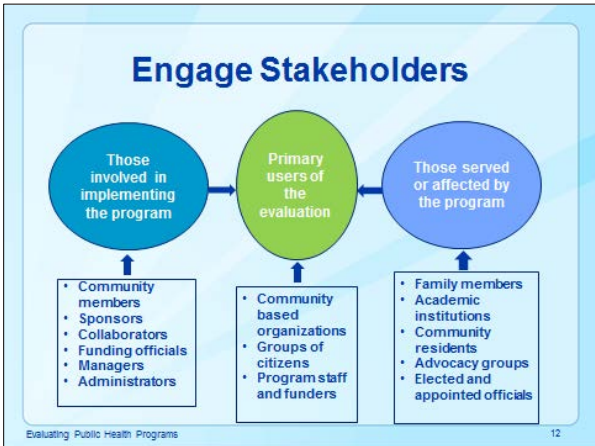

STEPS

- Engage stakeholders
- Describe the program
- Focus the evaluation design
- Gather credible evidence
- Justify conclusions
- Ensure use and share lessons learned

Standards:
Utility
Feasibility
Propriety
Accuracy

Evaluating Public Health Programs 10

Slide	Notes
--------------	--------------

Slide

Notes

Determine Which Stakeholders Matter the Most

Review your list of stakeholders and think about these questions:

- “Who do we *need to...*”
- Enhance credibility?
- Implement program changes?
- Advocate for changes?
- Fund, authorize, or expand the program?

Evaluating Public Health Programs

14

Plan How to Engage Stakeholders

Step 2: Describe the program: understanding program components, implementation and intended effects

Step 3: Focus the design: identifying useful and feasible questions to ask

Step 4: Gather credible evidence: selecting credible data methods and sources

Step 5: Justify conclusion: doing the analysis or interpreting findings

Step 6: Ensure use and lessons learned: disseminating results or acting on findings

Evaluating Public Health Programs

15

Checklist for Engaging Stakeholders

- Identify stakeholders: those involved in operations, those affected, and those who will use the evaluation results.
- Review the initial list of stakeholders to identify key stakeholders needed to improve credibility, implementation, advocacy, or funding/authorization decisions.
- Create a plan for stakeholder involvement.

Evaluating Public Health Programs

16

Slide

Notes

Exercise - Step 1: Engage Stakeholders

1. In this lesson, you will practice the six steps for effective program evaluation
2. The case study is comprised of six sections. You will complete one section at a time in a small group, as instructed by your facilitator
3. In your small group, you will read the background information and answer only the questions for the section you have been instructed to complete
4. You will have 40 minutes to complete Step 1: Engage Stakeholders

Evaluating Public Health Programs

17

Step 2- Describe the Program

Evaluating Public Health Programs

18

Describe the Program

Develop a clear and succinct description of your program that will clarify the program's purpose, activities, and capacity to meet its intended goals

Evaluating Public Health Programs

19

Slide	Notes
-------	-------

Describe a Program

- Document the need for the program
- State expected effects
- Identify program activities
- Determine program resources
- Recognize stage of development
- Describe program context
- Prepare a logic model (optional)

Evaluating Public Health Programs 20

Document the Need

- Description of need for program should answer these questions:
 - What is the health problem and its consequences for the community?
 - What is the overall size of the problem and in various segments of the population?
 - What are the determinants of the health problem?
 - Who are the target groups?
 - What changes or trends are occurring?

Evaluating Public Health Programs 21

State Expected Effects

Program Planners

- Goal
- Objectives

Program Evaluators

- Long-term outcomes
- Intermediate outcomes
- Short-term outcomes

Evaluating Public Health Programs 22

Slide

Notes

Outcomes

- Long-term outcome: ultimate impact, such as social or environmental change
- Intermediate outcome: medium-term results, such as behavior or policy change
- Short-term outcome: short-term efforts of program, such as knowledge, attitude, skills and awareness change

Evaluating Public Health Programs

23

Identify Program Activities

- Identify the activities that will produce or lead to your goal and outcomes
- What are the specific strategies and actions we need to take to meet our program expectations?

Evaluating Public Health Programs

24

Determine Program Resources

- Money
- People / Organizations
- Time
- Materials
- Equipment

Evaluating Public Health Programs

25

Slide

Notes

Recognize Stage of Development

- Maturity of a program
- Influences type of evaluation and outcomes to measure
- Three stages of development:
 1. Planning
 2. Implementation
 3. Maintenance / outcomes

Evaluating Public Health Programs

26

Describe Context

- Environment in which a program exists
- Factors that can influence program context:
 - Politics
 - Funding
 - Competing interests
 - Competing organizations
 - Social and environmental conditions
 - History (of program, agency, past collaboration)

Evaluating Public Health Programs

27

Prepare a Logic Model

- A logic model is one way of describing a program
- There are other acceptable approaches
- The important thing is to have a clear program description, and a logic model is one way to get there

Evaluating Public Health Programs

28

Slide	Notes
--------------	--------------

What Is a Logic Model?

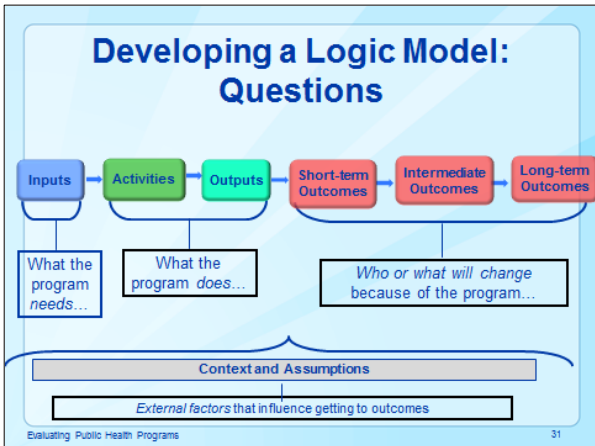

- A graphic representation of the intended relationship between a program's activities and their intended effects
- Visually represents the program theory—why we expect the program to work—and helps identify any gaps in the program logic
- May describe a program at a high level or at an operational or ground level

Evaluating Public Health Programs 29

Developing a Logic Model: Steps

1. Identify and list:
 - a) Intended effects or "outcomes"
 - b) Activities
2. Order by time
3. Elaborate by:
 - a) Adding boxes to represent inputs (resources) and outputs (results of activities)
 - b) Drawing arrows to show relationships
 - c) Considering assumptions, context, and stage of development
4. Review and refine

Evaluating Public Health Programs 30

Slide **Notes**

Developing a Logic Model: Step 1

1a. Identify and list intended effects or "outcomes"

outcomes

↓

Reduced exposure of young people to SHS
 Reduced exposure of adult nonsmokers to SHS

LT

↓

Increased percentage of workplaces with restrictions or prohibitions on smoking
 Increased percentage of smoke-free homes and cars

Intermediate

↓

Increased awareness of, and exposure to, messages about the hazards of SHS
 Increased knowledge and improved attitudes and skills related to SHS

ST

Evaluating Public Health Programs 32

Developing a Logic Model: Identify and List Activities

1b. Identify and list activities

Activities

↓

- Policy and regulatory action
- Counter-marketing
- Community mobilization

Evaluating Public Health Programs 33

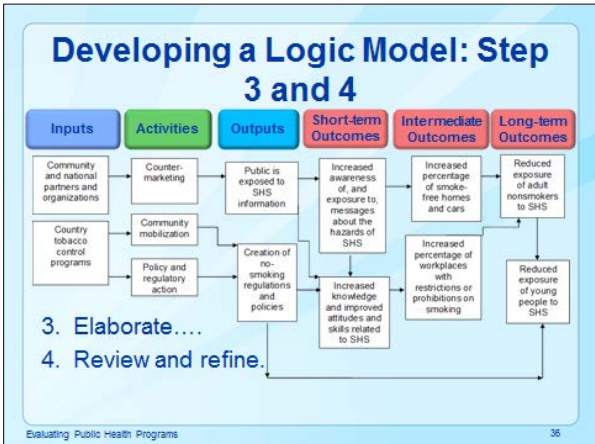

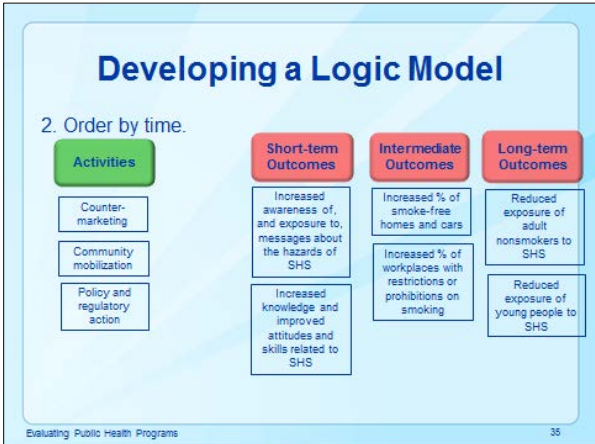

Developing a Logic Model: Step 2

2. Order by time.

Short-term Outcomes	Intermediate Outcomes	Long-term Outcomes
Increased awareness of, and exposure to, messages about the hazards of SHS	Increased % of smoke-free homes and cars Increased % of workplaces with restrictions or prohibitions on smoking	Reduced exposure of adult nonsmokers to SHS Reduced exposure of young people to SHS
Increased knowledge and improved attitudes and skills related to SHS		

Evaluating Public Health Programs 34

Slide **Notes**

Applying Standards: Figure 1

Standards	Question
Utility	<ul style="list-style-type: none"> Is the level of detail appropriate for the intended user(s)? Is the logic model clear to those who need to use the information to make decisions related to the evaluation?
Feasibility	<ul style="list-style-type: none"> Does the program description include at least some activities and outcomes that are in control of the program?
Propriety	<ul style="list-style-type: none"> Does the description include sufficient detail for users to critically assess the content?
Accuracy	<ul style="list-style-type: none"> Would diverse stakeholders consider the logic model a reasonable representation of the program?

Evaluating Public Health Programs 37

Slide	Notes
-------	-------

Checklist for Describing the Program

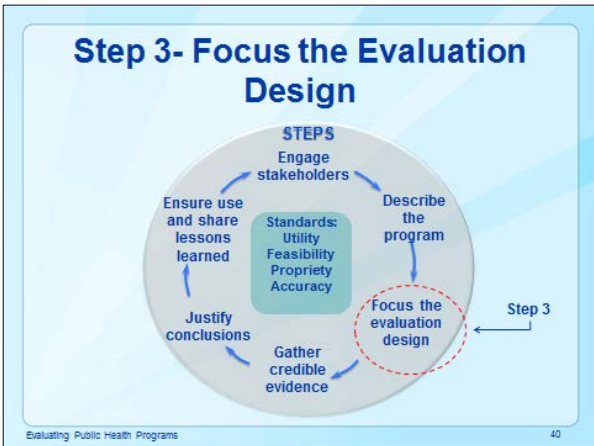

- Document the need for the program
- State expected effects
- Identify program activities
- Determine program resources
- Recognize stage of development
- Describe program context
- Prepare a logic model (optional)

Evaluating Public Health Programs 38

Exercise - Step 2: Describe Program

1. In your small group, complete step 2 of the evaluation process— describe the program
2. You will have 1 hour to complete this part of the exercise
3. Be prepared to share your work with the rest of the class

Evaluating Public Health Programs 39

Slide

Notes

Focusing the Evaluation

- What is the purpose of the evaluation?
- Who is the user?
- What use will they make of the evaluation?
- What questions need to be answered?

Evaluating Public Health Programs

41

Determine Purpose

- Show accountability
- Examine program implementation
- Determine program improvement
- Facilitate judgment about a program's fate

Evaluating Public Health Programs

42

Determine Intended Users

- Identify those who will use the evaluation results
- Information needs of intended users will determine how you focus the evaluation
- Give intended users the opportunity to provide input into the design
- Support from users will increase likelihood that they will use the evaluation results

Evaluating Public Health Programs

43

Slide

Notes

Determine Use

- How evaluation results will be used depends on purpose and intended users of the evaluation
- Evaluation information may be used, for example to:
 - Decide how to allocate resources
 - Apply for additional funding
 - Mobilize community support
 - Change or expand the locations of the intervention
 - To improve the content and/or delivery of the program

Evaluating Public Health Programs

44

Design Questions

- Design evaluation questions to meet stakeholder needs
- Your evaluation team and stakeholders should agree on the questions
- Consider the stage of your program's development
 1. Planning
 2. Implementation
 3. Maintenance

Evaluating Public Health Programs

45

Focus the Evaluation: Scenario 1

After one year of implementing your program to reduce exposure to secondhand smoke, other communities/organizations are interested in adapting your model/program

Purpose:

To examine program implementation

User:

Other communities/organizations

Use:

To determine whether to adopt the program

Evaluating Public Health Programs

46

Slide

Notes

Focus the Evaluation: Scenario 2

After 5 years of implementation, you need to demonstrate to legislators the importance of your efforts for a secondhand smoke program in order to justify continued funding

Purpose:

To facilitate judgment about a program's fate

User:

Your organization and/or the legislators

Use:

To show evidence that proves sufficient effectiveness to warrant funding

Evaluating Public Health Programs

48

Checklist for Focusing the Evaluation

- Determine the purpose of the evaluation
- Determine the intended users of the evaluation
- Determine how evaluation results will be used
- Design evaluation questions
- Consider stage of program development

Evaluating Public Health Programs

50

Exercise - Step 3: Focus the Evaluation Design

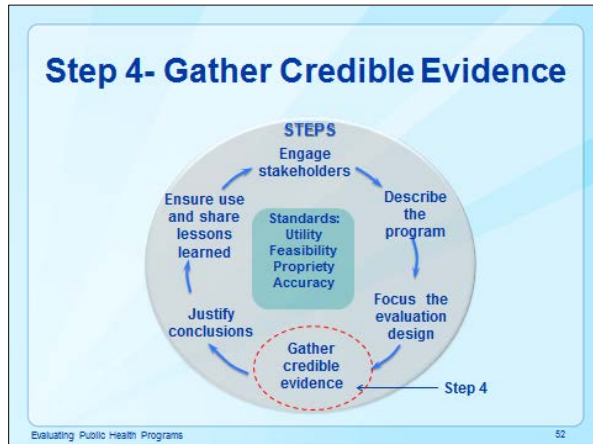

1. In your small group, complete step 3 of the evaluation process—focus the evaluation design
2. You will have 30 minutes to complete this part of the exercise
3. Be prepared to share your work with the rest of the class

Evaluating Public Health Programs

51

Slide

Notes

Gather Credible Evidence

- Information must be perceived as trustworthy and relevant by the evaluation's primary users
- When stakeholders find evaluation data to be credible, they are more likely to accept the findings and to act on the recommendations

Evaluating Public Health Programs 53

How to Gather Credible Evidence

- Identify indicators to answer each evaluation question
- Indicators should be:
 - Specific
 - Observable
 - Measurable
 - Relevant
 - Identify where or how you will get the data

Evaluating Public Health Programs 54

Slide

Notes

Example 1- Indicators

Evaluation Question

Was the public exposed to second hand smoke information?

Indicators

- The number of news stories on secondhand smoke in major newspapers
- The number of advertisements on billboards, radio and television

Evaluating Public Health Programs

55

Example 2- Indicators

Evaluation Question

Is there an increase in the number of workplaces with restrictions or prohibition on smoking?

Indicators

- The percentage of workplaces with policies that prohibit or restrict smoking
- The percentage of adults employed at work sites with formal policies that prohibit smoking

Evaluating Public Health Programs

56

Example 3- Indicators

Evaluation Question

Have there been changes in tobacco-related attitudes and beliefs?

Indicators

- The percentage of adults who believe breathing secondhand smoke is bad for them
- The percentage of adults who believe smoking around children is harmful

Evaluating Public Health Programs

57

Slide **Notes**

Key Data Collection Sources/Methods

People Review Documents Observations Secondary Data Analysis

Evaluating Public Health Programs 58

Choosing Data Collection Methods

Function of context:

- Time
- Cost
- Ethics

Function of content to be measured:

- Sensitivity of the issue
- Validity
- Reliability

Evaluating Public Health Programs 59

Example 1-Data Collection Sources/Methods

Question	Indicator	Data Source / Method
Was the public exposed to second-hand smoke information?	<ul style="list-style-type: none"> • The number of news stories on secondhand smoke in major newspapers • The number of advertisements on billboards, radio and television 	Analysis of media materials

Evaluating Public Health Programs 60

Slide

Notes

Applying Standards: Figure 2

Standards	Question
Utility	<ul style="list-style-type: none"> Have <u>existing</u> data sources been considered prior to <u>new</u> data collection? Will specific methods or data sources enhance credibility of the data with stakeholders?
Feasibility	<ul style="list-style-type: none"> Can proposed data and analysis be implemented within the time line and budget?
Propriety	<ul style="list-style-type: none"> Do issues of safety or confidentiality exist that must be addressed?
Accuracy	<ul style="list-style-type: none"> Does data collection address how good the findings need to be?

Evaluating Public Health Programs

62

Checklist for Gathering Credible Evidence

- Identify specific indicators to answer each evaluation question
- Identify where or how you will get the data
- Choose data collection methods by considering:
 - Time
 - Cost
 - Ethics
 - Sensitivity of the issue
 - Validity
 - Reliability

Evaluating Public Health Programs

63

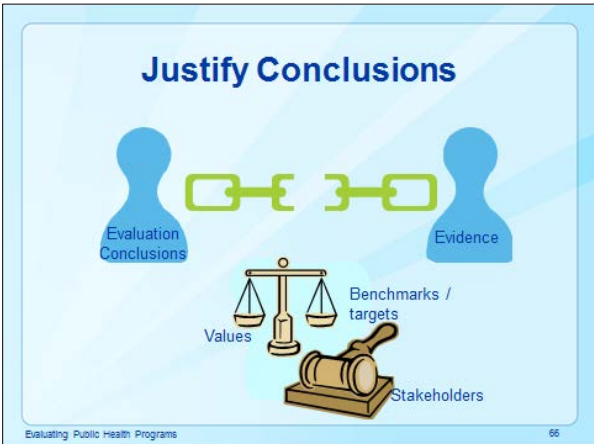

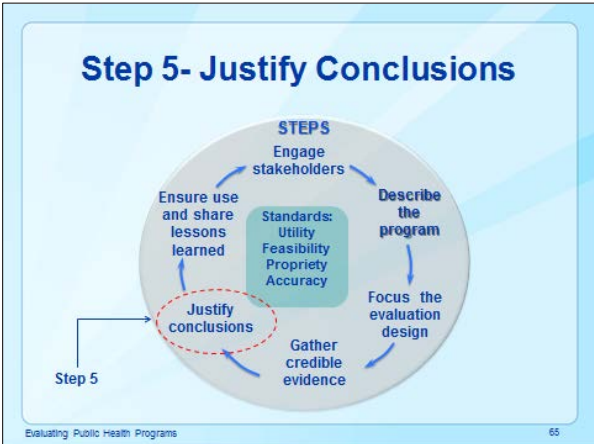

Exercise - Step 4: Gather Credible Evidence

- In your small group, complete step 4 of the evaluation process—gather credible evidence
- You will use information from the previous steps in the evaluation
- You will have 20 minutes to complete this part of the exercise
- Be prepared to share your work with the rest of the class

Evaluating Public Health Programs

64

Slide **Notes**

- ### How to Justify Conclusions
- Determine benchmarks/ targets
 - Analyze data
 - Interpret findings
 - Make judgments
 - Make recommendations
- Evaluating Public Health Programs 67

Slide

Notes

Determine Benchmarks / Targets

- Determine which stakeholder values provide the basis for forming judgments
- Articulate and negotiate the values that will be used to consider a program "successful", "adequate", or "unsuccessful".
- Possible standards that might be used in determining these benchmarks:
 - Needs of participants
 - Program goals and objectives
 - Community values, expectations, and norms
 - Performance by similar programs
 - Performance by a comparison group

Evaluating Public Health Programs

68

Analyze Data

- Enter data into database and check for errors
- Tabulate data
- Stratify data by demographic variables of interest
- Make comparisons
- Present data in a clear and understandable format

Evaluating Public Health Programs

69

Interpret Findings

- Consider program goals when interpreting results
- Determine what the analysis says about your program
 - Are the results similar to what you expected? If not, why do you think they may be different?
 - Are there alternative explanations for your results?
 - How do the results compare with those of similar programs?
- Consider limitations of the evaluation:
 - Possible biases
 - Validity of results
 - Reliability of results

Evaluating Public Health Programs

70

Slide

Notes

Make Judgments

- Judgments:
 - Statements about a program's merit, worth or significance
- Compare findings and interpretations against one or more selected program standards
- Stakeholders may reach different or conflicting judgments

Evaluating Public Health Programs

71

Make Recommendations

- Actions to consider as a result of an evaluation
- Identify your audience
- Involve your stakeholders to ensure recommendations will be relevant and useful
- The purpose of your evaluation will shape how you frame your recommendations

Evaluating Public Health Programs

72

Making Meaningful Recommendations: Example

Audience: legislators

Purpose of evaluation: to facilitate judgment about a program's fate

Results: (from Global Adult Tobacco Survey) 80% of adults believe breathing secondhand smoke is bad for them; 90% of adults believe smoking around children is harmful.

Recommendation: continue funding the program

Evaluating Public Health Programs

73

Slide

Notes

Applying Standards: Figure 3

Standards	Example Questions
Utility	<ul style="list-style-type: none"> • Have you carefully described the perspectives, procedures, and rationale used to interpret the findings? • Have stakeholders considered different approaches for interpreting the findings?
Feasibility	<ul style="list-style-type: none"> • Is the approach to analysis and interpretation appropriate to the level of expertise and resources? • Are the recommendations realistic for the program to implement?
Propriety	<ul style="list-style-type: none"> • Are the conclusions and recommendations reflective and respectful of key stakeholders, including those served by the program?
Accuracy	<ul style="list-style-type: none"> • Can the conclusions explicitly be justified? • Are the conclusions understandable to stakeholders?

Evaluating Public Health Programs

74

Checklist for Justifying Conclusions

- Determine benchmarks/ targets
- Analyze data
- Interpret findings
- Make judgments
- Make recommendations

Evaluating Public Health Programs

75

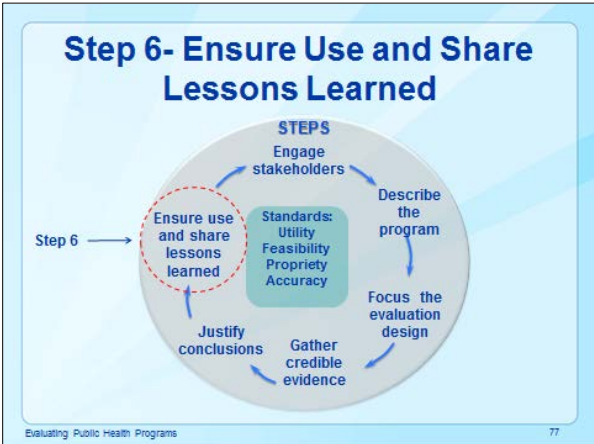

Exercise- Step 5: Justify Conclusions

1. In your small group, complete step 5 of the evaluation process—justify conclusions
2. You will have 30 minutes to complete this part of the exercise
3. Be prepared to share your work with the rest of the class

Evaluating Public Health Programs

76

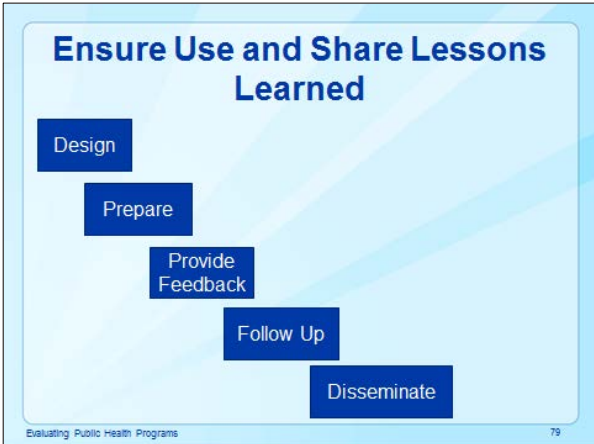

Slide	Notes
--------------	--------------

When to Consider Use?

Relevant
Step 1 – Engage stakeholders Step 2 – Describe the program Step 3 – Focus the evaluation design
Accurate
Step 4- Gather credible evidence

Evaluating Public Health Programs 78

Slide

Notes

Why an Evaluation Communication Plan?

- Helps plan for communications throughout an evaluation
- Increases likelihood that information will meet users' needs
- Increases likelihood of evaluation use
- Informs the evaluation budget

Evaluating Public Health Programs

80

Elements of a Communication Plan

- Identify the intended audience
- Tailor format and style of the communication
- Specify reporting frequency and timing
- Attend to deadlines

Evaluating Public Health Programs

81

Sample Communication Plan

Stakeholder Audience	What to Communicate	Method of Communication	Frequency
XX	1. Progress report on evaluation activities	XX	XX
XX	2. Interim findings	XX	XX
XX	3. Final findings	XX	XX
XX	4. Follow-up activities	XX	XX

From: Torres, Preskill & Plontek, 1996

Evaluating Public Health Programs

82

Slide

Notes

Formal Communication Formats

- Verbal presentations
- Videotape presentations
- Conferences
- Public meetings
- Written reports
- Executive summaries
- Chart essays
- Poster sessions

Evaluating Public Health Programs

84

Choosing Communication Format

- Accessibility
- Reading ability
- Familiarity with the program and/or the evaluation
- Role in decision making
- Familiarity with research and evaluation methods
- Experience using evaluation findings

Evaluating Public Health Programs

85

Combine More Interactive and Less Interactive Formats

Evaluating Public Health Programs

86

Slide

Notes

Applying Standards: Figure 4

Standards	Question
Utility	<ul style="list-style-type: none"> Has the evaluation been planned, conducted, and reported in a manner that encourages follow-through by stakeholders?
Feasibility	<ul style="list-style-type: none"> Are the findings communicated in formats appropriate given the available resources for the evaluation and the audiences?
Propriety	<ul style="list-style-type: none"> Have the evaluation findings (including limitations) been made accessible to the appropriate stakeholders?
Accuracy	<ul style="list-style-type: none"> Do evaluation reports impartially and fairly reflect evaluation findings?

Evaluating Public Health Programs

57

Checklist for Ensuring Use and Sharing Lessons Learned

- Design evaluation from the start to achieve its intended use by the intended users
- Prepare users ahead of time to use evaluation findings
- Provide continuous feedback to ensure that primary intended users and other stakeholders have opportunities to comment on evaluation decisions
- Follow-up with stakeholders to facilitate transfer of evaluation findings into strategic decision-making
- Disseminate evaluation procedures or lessons learned to relevant audiences in a timely, unbiased, and consistent manner

Evaluating Public Health Programs

58

Exercise - Step 6: Ensure Use of Evaluation

1. In your small group, complete step 6 of the evaluation process—ensure use of evaluation
2. You will use information from the previous steps in the evaluation
3. You will have 20 minutes to complete this part of the exercise
4. Be prepared to share your work with the rest of the class

Evaluating Public Health Programs

59
