

In 2013, **21.8** million babies did not receive the 3rd doses of vaccinations needed to protect them against **PREVENTABLE** but **deadly** diseases – that's **1** out of every 5 babies **unprotected**

70% of these **babies** live in only **10 countries:**

India

Nigeria

Pakistan

Ethiopia

DR Congo

Indonesia

Vietnam

Mexico

South Africa

Kenya

We can **reach every child** with all recommended life-saving vaccinations, no matter where he or she lives, by improving:

Healthworker training and practices

Caregiver knowledge and practices

Vaccine supply and forecasting

Vaccination sessions near communities

Using data to take action
