

CDC *in* Malawi

The U.S. Centers for Disease Control and Prevention (CDC) has been working in Malawi since 2001 in order to achieve key public health goals in partnership with the Malawi Ministry of Health. CDC Malawi engages in the President's Emergency Plan for AIDS Relief (PEPFAR) and President's Malaria Initiative (PMI). Key areas of focus include: improving disease surveillance systems; training Malawi doctors, nurses, laboratorians, environmental health officers, and epidemiologists; scaling-up medical informatics capacity; strengthening monitoring and evaluation activities through improved use of information technology, and laboratory capacity development.

Tested **7,899,176** individuals of whom **1,004,596** were HIV-positive and newly initiated on ART

300,790 HIV patients alive and on treatment, including 26,220 children < 15 years old (CDC supported sites support 43% of total persons on ART in Malawi) in 2016

75,377 voluntary medical male circumcisions (VMMCs) to reduce HIV transmission by 2016

207,337 women reached with Prevention of Mother-to-Child HIV Transmission services

Graduated third class of field epidemiology and training program fellows- national "disease detectives"

Support programs to reduce risk of HIV transmission to adolescent girls and young women

How CDC Malawi contributes

to the National TB/HIV and Malaria response and builds public health capacity

Support key populations and other priority populations with HIV prevention, testing and treatment to achieve **90-90-90** goals, leaving no one behind

Support provision of isoniazid preventive therapy, TB screening, diagnosis, and TB treatment for people living with HIV

Support research into insecticides to combat the malaria mosquito vector

>45% of patients on HIV treatment managed through electronic medical record system

Support labs to attain accreditation, maintain quality diagnostic tests, and scale up viral load testing

Promote national birth and death registration efforts with **52,000** births and **1,200** deaths registered by 2016

Completed population based HIV impact assessment survey which demonstrated progress towards HIV epidemic control

Supporting health infrastructure projects in high HIV burden districts nationwide

Support over **900** health care workers with pre-service training
