

WORLD MALARIA DAY

Zero Malaria Starts with Me

APRIL 25

GLOBAL MALARIA

3.2B PEOPLE

Nearly half of the world's population is at risk of malaria

MORE THAN 2/3

of all malaria deaths are in children under 5

IN 2018 WORLDWIDE

228M

Malaria Cases

405K

Malaria Deaths

PROGRESS

COMPARED TO 2000

Annual number of global malaria deaths cut in half, saving 7M lives globally since 2001

SINCE 2005

MORE THAN 1B

Antimalarial treatments (ACTs) and bed nets provided by global partners

CDC'S IMPACT

Providing scientific leadership in elimination science

Strengthening surveillance systems to provide data for decision-making

Supporting countries to scale up interventions through the President's Malaria Initiative (with USAID)

Evaluating diagnostics, vaccines, and vector control tools to further drive down transmission and burden

Monitoring and mitigating threats from drug and insecticide resistance to continued progress

Preventing, treating, and tracking malaria in the U.S.
