The Targeted Assessment for Prevention Strategy

A quality improvement framework that targets resources to maximize efficiency for the reduction of healthcare-associated infections (HAIs)

CAUTI • CDI • CLABSI

Prevent HAIs by targeting locations with excess infections, assessing for gaps, and implementing interventions

TARGET

TAP Reports use data for action to identify facilities and units with the greatest burden of excess infections, targeting efforts to most efficiently reach prevention goals

PREVENT

TAP Implementation Guides contain actionable tools and resources that allow facilities to customize their interventions based on identified gaps

ASSESS

TAP Assessments systematically identify gaps in prevention and opportunities for improvement, while serving as real-time teaching moments among multidisciplinary staff

The Centers for Disease Control and Prevention (CDC) is available to assist with all aspects of implementing the TAP Strategy. Please email HAIPrevention@cdc.gov for assistance and visit the TAP website for more information: http://www.cdc.gov/hai/prevent/tap.html
