Voluntary Guidelines for Managing Food Allergies in Schools and Early Care and Education Programs
Objectives

- Describe the symptoms of food allergies and life-threatening reactions.
- Identify three actions to help support the daily management of students with food allergies.
- Identify two ways to support healthy and safe classrooms and schools for students with food allergies.
The guidelines can help schools manage the risk of food allergies and severe allergic reactions in students.

Managing food allergies requires a partnership between families, health care providers, and schools.
Did you know?

- In a classroom of 25 students, at least 1 student is likely to be affected by food allergies.

- Students with food allergies may experience more anxiety and fear than their nonallergic peers.

- More than 1 of 3 people with food allergies report being the victims of bullying, teasing, or harassment because of their food allergy.

More than 1 of 3 people with food allergies report being the victims of bullying, teasing, or harassment because of their food allergy.
What can you do?

- Plan!
  - Know your school district’s food allergy policies and rules.
  - Know your school’s Food Allergy Management and Prevention Plan.
  - Become familiar with student emergency care plans.
What can you do?

- Get trained!
  - Participate in training and review resources.
  - Know the signs and symptoms of food allergies and how to respond in an emergency.
What can you do?

- Learn about food allergies!
  - A food allergy is an adverse immune system reaction that occurs soon after exposure to a certain food.
  - Any food can cause a food allergy, but most are caused by milk, eggs, fish, shellfish, wheat, soy, peanuts, and tree nuts.
  - A severe life-threatening allergic reaction is called anaphylaxis.
What can you do?

- Recognize food allergy symptoms!
  - Food allergy symptoms can include
    - Swollen lips, tongue, or eyes.
    - Itchiness, rash, or hives.
    - Nausea, vomiting, or diarrhea.
    - Congestion, hoarse voice, or trouble swallowing.
    - Wheezing or difficulty breathing.
    - Dizziness, fainting, or loss of consciousness.
    - Mood change or confusion.
What can you do?

- If you suspect anaphylaxis
  1. Activate the student’s Food Allergy Management and Prevention Plan and contact the school nurse or administrator.
  2. Be ready to administer an epinephrine auto-injector if you are delegated and trained to do so.
  3. Call 911 or the emergency medical system immediately. All students with anaphylaxis must be monitored closely and evaluated as soon as possible in an emergency care setting.
What can you do?

- Help with the daily management of students with food allergies.
  - Provide assistance with the development of a Section 504 or an Individualized Education Program, if needed.
  - Address immediate and long-term mental health problems, such as anxiety, depression, social isolation, and stress.
  - Help connect families with community health providers and resources.
What can you do?

- Support a healthy and safe school environment for students with food allergies.
  - Support other school health professionals by providing training and education for staff and parents on the mental and emotional health issues faced by students with food allergies.
  - Report all bullying to the administrator.
  - Work with parents, classroom teachers, and other school staff to prevent bullying and discrimination against students with food allergies.
