The Training of Trainers (ToT) Model

The Training of Trainers (ToT) model is intended to engage master trainers in coaching new trainers that are less experienced with a particular topic or skill, or with training overall. A ToT workshop can build a pool of competent instructors who can then teach the material to other people. Instead of having just one trainer who teaches a course for a long time, there are multiple trainers teaching the same course at the same time in the ToT model. This means a new participant typically gets to watch an experienced trainer teach, complete the exercises, and then practice teaching segments to other participants. The master trainer and trainer participants should use the CDC Professional Development (PD) Best Practices.

Goals

The main goal of the ToT model is to prepare instructors to present information effectively, respond to participant questions, and lead activities that reinforce learning. Other goals include ensuring that trainers can:

- Direct participants to supplementary resources and reference materials.
- Lead discussions.
- Listen effectively.
- Make accurate observations.
- Help participants link the training to their jobs.

Trainer participants also learn the importance of maintaining eye contact, presenting a positive attitude, speaking in a clear voice, gesturing appropriately, and maintaining interest and dispelling confusion.

ToT Objectives

As a result of attending a ToT, participants will be able to:

1. Apply current practices in delivering a training on a selected evidence-based program.
2. Deliver proven facilitative skills to promote learner engagement, reflective practice, critical thinking, and skill acquisition.
3. Show mastery in delivering key training strategies commonly used; such as, brainstorming, processing/process checks, roleplays, and practice sessions.
4. Use appropriate levels of intervention when managing difficult training situations, including disruptive learner behaviors.
5. Initiate a personal plan of action to strengthen their training and facilitation skill.

ToT Components

When designing a ToT, it is necessary to allow enough time to ensure the effective transfer of learning. Consider the type and number of topics when determining how much time a training session needs, and include the following elements:

- Pre-assessment.
- Pre-work.
- Trainer and participant agenda.
- Facilitation manual.
- Modeling of the skills and topic to be delivered.
- Adult learning principles.
- Skill practice and feedback.
- Action planning.
- Planned follow-up support.

Eligibility for Participation in a ToT

To be effective in achieving intended outcomes, prospective ToT participants must be highly qualified, seasoned trainers who have demonstrated the following:

- An advanced skill level in training and facilitation skills and engagement of adult learners.
- Success in the field and champions for the topic area.
- Completion of the entire training workshop.
- Ability to deliver the training when needed (flexible; able to travel).
The main goal of the ToT model is to prepare instructors to present information effectively, respond to participant questions, and lead activities that reinforce learning.

Train instructors
A ToT workshop can build a pool of competent instructors who can then teach the material to other people.

Direct participant
Direct participants to supplementary resources and reference materials.

Lead discussions
Lead activities that reinforce learning.

Listen effectively
Helps instructors be more effective in their practice and more responsive to the needs of the learners they serve.

Make observations
Provide insight into how adults learn, and can help instructors be more effective in their practice.

Support participants
Provides completed, continued, and targeted follow-up support once a professional development event has been completed.

A ToT workshop can build a pool of competent instructors who can then teach the material to other people.
