How to make water safe using household bleach

Clear water

- Pour 8 drops into 1 gallon (4 liters)
- Shake it well.
- Wait for 30 minutes

Cloudy water

- Pour 16 drops into 1 gallon (4 liters)
- Shake it well.
- Wait for 30 minutes

Warnings

No covered container? Drink and use water on the same day it was treated.
Do not use your hands, a cup, or other object to take water out of the container.

Do not drink water that has not been treated.
No spigot on the container? Pour water from the container into a clean cup.
