\*No reported outbreaks in community water systems had unknown water source.

<sup>†</sup>Includes outbreaks with mixed water sources (i.e. ground water and surface water). Two giardiasis outbreaks were associated with mixed source community water systems.

<sup>§</sup>Hospital information is unknown for two of these outbreaks, and death information is unknown for three of these outbreaks.

<sup>¶</sup>One outbreak had multiple etiologic agent types. The etiologies were *Campylobacter* spp. (i.e., bacterium) and *Giardia intestinalis* (i.e., parasite).
