Tobacco Use and United States Students

What is the problem?

The 2015 national Youth Risk Behavior Survey indicates that among U.S. high school students:

**Cigarette Use**
- 32% ever tried cigarette smoking. (1)
- 11% smoked cigarettes on at least 1 day during the 30 days before the survey.
- 3% smoked cigarettes on 20 or more days during the 30 days before the survey.
- 2% ever smoked at least one cigarette every day for 30 days.
- 45% of current cigarette smokers tried to quit smoking cigarettes during the 12 months before the survey.

**Smokeless Tobacco and Cigar Use**
- 7% used smokeless tobacco (e.g., chewing tobacco, snuff, or dip) on at least 1 day during the 30 days before the survey.
- 10% smoked cigars, cigarillos, or little cigars on at least 1 day during the 30 days before the survey.

**Electronic Vapor Use**
- 45% ever used electronic vapor products. (2)
- 24% used electronic vapor products on at least 1 day during the 30 days before the survey. (2)

**Any Tobacco Use**
- 31% used cigarettes, smokeless tobacco, cigars, or electronic vapor products on at least 1 day during the 30 days before the survey.

What are the solutions?

Better health education • More family and community involvement
Healthier school environments • More comprehensive health services

What is the status?

The School Health Policies and Practices Study 2014 indicates that among U.S. high schools:

**Health Education**
- 85% required students to receive instruction on tobacco-use prevention.
- 61% provided students with the opportunity to practice communication, decision-making, goal-setting, or refusal skills related to tobacco use prevention in a required health education course.

**Family and Community Involvement**
- 27% had a school health council that addressed tobacco-use prevention.
- 14% involved students’ families and 29% involved community members in the development, communication, and implementation of policies or activities related to tobacco-use prevention.
- 25% had or participated in a youth empowerment or advocacy program related to tobacco-use prevention.

**School Environment**
- 74% prohibited all tobacco use in all locations. (3)
- 90% prohibited all tobacco advertising. (4)
- 72% posted signs marking a tobacco-free school zone.

**Health Services**
- 44% provided tobacco-use prevention services at school in one-on-one or small-group sessions.
- 31% provided tobacco-use prevention services to students through arrangements with providers not located on school property.
- 39% provided tobacco-use cessation services at school.
- 22% provided tobacco-use cessation services to students through arrangements with providers not located on school property.
