1. Representative data are weighted to be representative of all students in grades 9–12 attending public schools in each jurisdiction. With representative data, it is possible to say, for example, "X% of students in state Y never or rarely wore a seat belt when riding in a car driven by someone else."
2. Data from these sites represent only the students who completed the survey.
3. Sites that have given CDC permission to distribute their data files to people interested in additional data analyses are represented by "Yes." Sites that have not given CDC permission to distribute their data files are represented by "No;" these sites will need to be contacted directly to arrange access to data files. Sites that do not have any years of weighted data are designated by "N/A." Refer to the Data Availability and Requesting Data Files section of the Frequently Asked Questions page at www.cdc.gov/yrbss for more information.
