

## Trends in the Prevalence of Behaviors that Contribute to Violence on School Property

### National YRBS: 1991–2013

The national Youth Risk Behavior Survey (YRBS) monitors priority health risk behaviors that contribute to the leading causes of death, disability, and social problems among youth and adults in the United States. The national YRBS is conducted every two years during the spring semester and provides data representative of 9<sup>th</sup> through 12<sup>th</sup> grade students in public and private schools throughout the United States.

Percentages												Long term Change <sup>1</sup>	Change from 2011 2013 <sup>2</sup>
1991	1993	1995	1997	1999	2001	2003	2005	2007	2009	2011	2013		
<b>Carried a weapon on school property</b> (such as, a gun, knife, or club on at least 1 day during the 30 days before the survey)													
— <sup>3</sup>	11.8	9.8	8.5	6.9	6.4	6.1	6.5	5.9	5.6	5.4	5.2	Decreased 1993–2013 Decreased 1993–1999 Decreased 1999–2013	No change
<b>Were threatened or injured with a weapon on school property</b> (such as, a gun, knife, or club one or more times during the 12 months before the survey)													
—	7.3	8.4	7.4	7.7	8.9	9.2	7.9	7.8	7.7	7.4	6.9	Decreased 1993–2013 No change 1993–2003 Decreased 2003–2013	No change
<b>Were in a physical fight on school property</b> (one or more times during the 12 months before the survey)													
—	16.2	15.5	14.8	14.2	12.5	12.8	13.6	12.4	11.1	12.0	8.1	Decreased 1993–2013	Decreased
<b>Did not go to school because they felt unsafe at school or on their way to or from school</b> (on at least 1 day during the 30 days before the survey)													
—	4.4	4.5	4.0	5.2	6.6	5.4	6.0	5.5	5.0	5.9	7.1	Increased 1993–2013	No change
<b>Were bullied on school property</b> (during the 12 months before the survey)													
—	—	—	—	—	—	—	—	—	19.9	20.1	19.6	No change 2009–2013	No change

<sup>1</sup> Based on linear and quadratic trend analyses using logistic regression models controlling for sex, race/ethnicity, and grade,  $p < 0.05$ . Significant linear trends (if present) across all available years are described first followed by linear changes in each segment of significant quadratic trends (if present).

<sup>2</sup> Based on t-test analysis,  $p < 0.05$ .
