

Centers for Disease Control and Prevention National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention Division of Adolescent and School Health

August 2019

Dear Partners,

Back-to-school season brings a lot of excitement in DASH. As millions of students head back to school, we are reminded of the influence that schools can have in the daily lives of youth around the nation. Throughout August and September, DASH will be continuing to remind the public, public health professionals, and stakeholders about the important role schools play in promoting adolescent health.

We will be specifically highlighting the powerful impact that school and family connectedness can have on adolescents' health outcomes later in life. Schools can create environments that are safe, and provide a sense of being cared for, supported, and belonging. Families can provide these feelings of care and support at home, and help to influence healthy behaviors in adolescents. DASH is committed to establishing safe and supportive environments for all youth. I thank you for the commitment you have also shown in creating environments where all youth can thrive.

Make sure to follow DASH on Twitter (<u>@CDC_DASH</u>), if you do not already, to stay up-to-date on all of our back-to-school promotion and resources.

Best,

Kathleen

Kathleen A. Ethier, Ph.D. Director, Division of Adolescent and School Health National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention Centers for Disease Control and Prevention

What's New With DASH?

CDC/DASH Updates and Resources

- New Webpage on Adolescent Connectedness: <u>This webpage</u> describes the positive, lasting effects that school and family connectedness can have on adolescents' health and well-being, and actionable recommendations for promoting connectedness among youth.
- Cooperative Agreement Update: Funding for the second year of CDC-DASH's five-year cooperative agreement (<u>PS18-1807</u>) began on August 1st. This cooperative agreement supports education and health agencies for school-based HIV/STD prevention and surveillance. It also supports non-governmental organizations to provide technical assistance to these agencies. More information about implementing the school-based prevention model can be found in the <u>PS18-1807 Program</u> <u>Guidance</u>.
- **Back-to-School:** <u>Nine CDC Health Hacks for Back-to-School Success</u> provides tips and resources for parents and schools to help children and teens stay healthy.</u>
- New Webpage for the STI Federal Action Plan: <u>This HHS webpage</u> is the leading source of information on the development of the STI Federal Action Plan and will house the plan, information about its implementation and progress towards goals after it is released.
