

Analysis of State Health Education Laws

SOUTH CAROLINA SUMMARY REPORT

Overview

State laws and regulations in health education serve as a foundation to drive school-based programs and instruction. Well-designed and well-implemented sexual health education programs have been shown to reduce student risky sexual behaviors and improve health-related behaviors and outcomes. The following report provides a snapshot of **South Carolina** laws and regulations and school health policies and practices related to sexual health education, HIV prevention education, STD prevention education, and sexual health risk behaviors among **South Carolina** high school students.

South Carolina health education laws and regulations were analyzed across three topics of instruction (sexual health education, HIV Prevention, and STD Prevention) and a variety of characteristics related to curriculum and instruction. These characteristics were identified by researchers as potential facilitators for successful programs. The law and regulation data presented only indicate the presence or absence of a particular component related to health education and may not accurately reflect practice within the state.

South Carolina Law Facts

- The State Education Agency, Local Education Agencies, and Schools have the authority to choose or approve curriculum for sexual health education and STD Prevention instruction.
- Parents/Guardians must be provided the opportunity to Opt-out students from sexual health education and STD Prevention instruction.
- Instruction regarding contraception is optional for sexual health education and STD Prevention.
- Abstinence is a required topic of instruction for sexual health education.
