

# Analysis of State Health Education Laws

## WASHINGTON SUMMARY REPORT

### Overview

State laws and regulations in health education serve as a foundation to drive school-based programs and instruction. Well-designed and well-implemented sexual health education programs have been shown to reduce student risky sexual behaviors and improve health-related behaviors and outcomes. The following report provides a snapshot of **Washington** laws and regulations and school health policies and practices related to sexual health education, HIV prevention education, STD prevention education, and sexual health risk behaviors among high school students nationwide.

**Washington** health education laws and regulations were analyzed across three topics of instruction (sexual health education, HIV Prevention, and STD Prevention) and a variety of characteristics related to curriculum and instruction. These characteristics were identified by researchers as potential facilitators for successful programs. The law and regulation data presented only indicate the presence or absence of a particular component related to health education and may not accurately reflect practice within the state.

### Washington Law Facts

- Local Education Agencies have the authority to choose or approve curriculum for sexual health education and HIV Prevention instruction and Schools have the authority to create and approve curriculum for sexual health education instruction.
- Parents/Guardians must be provided the opportunity to Opt-out students from sexual health education and HIV Prevention instruction.
- Instruction regarding contraception is required for sexual health education.
- Abstinence is a required topic of instruction for sexual health education and HIV Prevention.
