Hepatitis C is the #1 cause of liver transplants and a leading cause of liver cancer

FOUR FACTS

1. 17,000 persons are waiting for a donated liver; 1,500 of them will die each year.
2. Hepatitis C can be cured in just 8 to 12 weeks.
3. LIVER CANCER is increasing the fastest compared to other cancers.
4. Curing hepatitis C reduces liver cancer risk by 75%.
