TOTAL FUNDING			\$284,000,400	\$ 54,830,000	\$338,830,400

Category A: 2012 Funding Amounts

All health departments received funding under Category A to conduct essential HIV prevention activities. For the first time, health departments are required to direct at least 75 percent of CDC funds in this category to four key areas: HIV testing; comprehensive prevention services for HIV-positive individuals and their partners; condom distribution; and efforts to align policies to optimize HIV prevention, care and treatment – such as efforts to eliminate external barriers to routine opt-out testing.

Category B: 2012 Funding Amounts

Under Category B, 24 states, the District of Columbia, Puerto Rico and eight cities with large numbers of African-Americans and Latinos living with HIV received additional funding to expand access to HIV testing services, primarily in healthcare settings, for these populations and others heavily affected by HIV.

Category C: 2012 Funding Amounts

CDC will award an additional \$20 million to health departments by March 2012 as part of this funding cycle to implement innovative HIV prevention demonstration projects.

Please note: Award information includes 2012 funding amounts only. Funding changes for allocating core HIV prevention resources to better match the geographic burden of the U.S. HIV epidemic will be implemented gradually over a five-year period and will be completed by 2016.
