

# HIV & Youth

Did you know not all youth (aged 13-24) with HIV are getting the care they need?

## Of youth with HIV:

**56%**

received an HIV diagnosis

**36%**

received HIV care

**27%**

retained in care\*

**25%**

virally suppressed†

[www.cdc.gov/hiv](http://www.cdc.gov/hiv)

\* Had 2 viral load or CD4 tests at least 3 months apart.

† A person with HIV who takes HIV medicine as prescribed and gets and stays virally suppressed or undetectable can stay healthy and has effectively no risk of transmitting HIV to HIV-negative partners through sex. Based on most recent viral load test.

Based on the most recent data available in March 2019.

Get Tested. Get in Care. Stay in Care. Be Healthy.
