

Native Hawaiians and Other Pacific Islanders With HIV

Not all Native Hawaiians and Other Pacific Islanders (NHOPI) are getting the care they need. For **every 100 NHOPI with HIV in 2016:**

60
received
some
HIV care

43
were
retained
in care

54
were virally
suppressed

For comparison, for every **100 people overall** with HIV,
64 received some HIV care, **49 were retained in care**, and **53 were virally suppressed**.
