HIV Mortality
2019
HIV Mortality Slides

- An analysis of trends in rates and distributions of deaths in the United States, focusing on deaths with human immunodeficiency virus (HIV) disease as the underlying cause (including stage 3 [acquired immunodeficiency syndrome, AIDS]).
- Data were compiled from death certificates from all 50 states and the District of Columbia by the National Center for Health Statistics (NCHS) for the years 1987–2019.
- For more information, see the NCHS Web site: http://www.cdc.gov/nchs/deaths.htm
Deaths due to HIV disease are not exactly the same as deaths of persons with HIV disease ever classified as stage 3 (AIDS).
Comparison of Deaths among persons with HIV Ever Classified as Stage 3 (AIDS) in National HIV Surveillance System and Deaths Reported in Death Certificates in which HIV Disease was the Underlying Cause of Death, 1987–2019—United States

For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.
Trends in Annual Age-Adjusted* Rates of Death with HIV Disease as the Underlying Cause, 1987–2019—United States

Note. For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.

Trends in Annual Age-Adjusted* Rates† of Death among Persons with Diagnosed HIV Infection Ever Classified as Stage 3 (AIDS)

1987–2019 — United States

†Per 1,000 persons with diagnosed HIV infection ever classified as stage 3 (AIDS).
Trends in annual Age-Adjusted* Rate of Death with HIV Disease as the Underlying Cause, by Sex, 1987–2019 — United States

Note. For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.
*Standard: age distribution of 2000 US population
Trends in Annual Age-Adjusted* Rates of Death and the Percentage Distribution of Deaths with HIV Disease as the Underlying Cause, by Sex, 1987–2019—United States

Note. For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.

Trends in Annual Rates of Death with HIV Disease as the Underlying Cause, by Age Group, 1987–2019 — United States

Note. For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.
Trends in Annual Age-Adjusted* Rates of Death and the Percentage Distribution of Deaths with HIV Disease as the Underlying Cause, by Age Group, 1987−2019—United States

Note. For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.

Median Age at Death with HIV Disease as the Underlying Cause
1987–2019—United States

Note. For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.
Age-Adjusted* Rates† of Death with HIV Disease as the Underlying Cause in the General Population, by State, 2019—United States

†Per 100,000 population.
Age-Adjusted* Rates† of All-Cause Death among Persons with HIV by State, 2019—United States

†Per 1,000 persons living with diagnosed HIV infection.

Rates per 1,000 persons living with diagnosed HIV infection:
- 2.3 - 9.5
- 9.6 - 10.8
- 10.9 - 13.0
- 13.1 - 16.9

Data classified using quartiles
Trends in Age-Adjusted* Annual Rates of Death with HIV Disease as the Underlying Cause, by Geographic Region, 1987–2019—United States

Note. For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.
Trends in Annual Age-Adjusted* Rates of Death and the Percentage Distribution of Deaths with HIV Disease as the Underlying Cause, by Geographic Region, 1987−2019—United States

Note. For comparison with data for 1999 and later years, data for 1987−1998 were modified to account for ICD-10 rules instead of ICD-9 rules.
Trends in Age-Adjusted* Annual Rates of Death with HIV Disease as the Underlying Cause, by Race/Ethnicity, 1990–2019—United States

Note. For comparison with data for 1999 and later years, data for 1987–1998 were modified to account for ICD-10 rules instead of ICD-9 rules.

**Hispanic/Latino persons can be of any race.
Trends in Annual Age-Adjusted* Rates of Death and the Percentage Distribution of Deaths with HIV Disease as the Underlying Cause, by Race/Ethnicity, 1990−2019—United States

Note. For comparison with data for 1999 and later years, data for 1987−1998 were modified to account for ICD-10 rules instead of ICD-9 rules.

** Hispanic/Latino persons can be of any race.

†Asian/Pacific Islander persons and American Indian/Alaska Native persons.
Age-Adjusted* Average Annual Rate of Death with HIV Disease as the Underlying Cause by Sex and Race/Ethnicity, 2015–2019 — United States

*Standard age distribution of 2000 US population

**Hispanic/Latino persons can be of any race.
Age-Adjusted* Average Annual Rate of Death with HIV Disease as the Underlying Cause by Race/Ethnicity and Geographic Region, 2015–2019 — United States

**Deaths (per 100,000 population)**

- **Northeast**
  - Black/African American: 7.42
  - Hispanic/Latino**: 2.96
  - American Indian/Alaska Native: 0.51
  - White: 0.25
  - Asian/Pacific Islander: 0.23

- **South**
  - Black/African American: 7.98
  - Hispanic/Latino**: 1.58
  - American Indian/Alaska Native: 1.14
  - White: 1.02
  - Asian/Pacific Islander: 0.28

- **West**
  - Black/African American: 5.22
  - Hispanic/Latino**: 1.29
  - American Indian/Alaska Native: 1.81
  - White: 0.98
  - Asian/Pacific Islander: 0.43

- **Midwest**
  - Black/African American: 4.24
  - Hispanic/Latino**: 0.82
  - American Indian/Alaska Native: 1.75
  - White: 0.46
  - Asian/Pacific Islander: 0.23

*Standard age distribution of 2000 US population

**Hispanic/Latino persons can be of any race.
Trends in Annual Rates of Death with HIV as the Underlying Cause versus the top 5 Leading Causes among Persons Aged 25–44 Years, 1987–2019 — United States

Trends in Annual Rates of Death due to HIV as the Underlying Cause versus the top 5 Leading Causes among Black/African American* Women Aged 25–44 Years
1999–2019—United States

Data source: Centers for Disease Control and Prevention, National Center for Health Statistics. CDC WONDER Online Database.

*Does not include persons of Hispanic/Latino ethnicity.

**Deaths with an underlying cause of unintentional overdose are a subset of deaths with an underlying cause of unintentional injury.
Trends in Annual Rates of Death with HIV as the Underlying Cause versus the top 5 Leading Causes among Hispanic/Latino* Men Aged 25–44 Years

1999–2019—United States

Data source: Centers for Disease Control and Prevention, National Center for Health Statistics. CDC WONDER Online Database.

*Hispanic/Latino persons can be of any race.

**Deaths with an underlying cause of unintentional overdose are a subset of deaths with an underlying cause of unintentional injury.
Trends in Annual Rates of Death due to HIV as the Underlying Cause versus the top 5 Leading Causes among Hispanic/Latina* Women, Aged 25–44 Years 1999–2019—United States

Data source: Centers for Disease Control and Prevention, National Center for Health Statistics. CDC WONDER Online Database.

*Hispanic/Latino persons can be of any race.

**Deaths with an underlying cause of unintentional overdose are a subset of deaths with an underlying cause of unintentional injury.
Trends in Annual Rates of Death with HIV as the Underlying Cause versus the top 5 Leading Causes among Asian and Pacific Islander* Persons Aged 25–44 Years 1999–2019—United States

Data source: Centers for Disease Control and Prevention, National Center for Health Statistics. CDC WONDER Online Database.

*Does not include persons of Hispanic/Latino ethnicity.

**Deaths with an underlying cause of unintentional overdose are a subset of deaths with an underlying cause of unintentional injury.
Annual Rate of Death with HIV as the Underlying Cause versus the top 5 Leading Causes among By Race/Ethnicity Aged 25–44 Years, 2019 — United States

Deaths (per 100,000 population)

Data source: Centers for Disease Control and Prevention, National Center for Health Statistics. CDC WONDER Online Database.

*Hispanic/Latino persons can be of any race.

**Rate of death is less than 0.5 deaths per 100,000 persons.

† Unreliable rate estimate due to a numerator of less than 20 deaths.
Annual Rate of Death with HIV as the Underlying Cause versus the top 5 Leading Causes among Black/African American, White, and Hispanic/Latino* Men Aged 25–44 Years, 2019 — United States

Data source: Centers for Disease Control and Prevention, National Center for Health Statistics. CDC WONDER Online Database.

* Hispanic/Latino persons can be of any race.
Annual Rate of Death with HIV as the Underlying Cause versus the top 5 Leading Causes among Black/African American, White, Hispanic/Latino* Women Aged 25–44 Years, 2019 — United States

Data source: Centers for Disease Control and Prevention, National Center for Health Statistics. CDC WONDER Online Database.

*Hispanic/Latino persons can be of any race.

**Rate of death is less than 0.5 deaths per 100,000 persons.
Conclusions

- After rapidly increasing since the 1980s, the annual rate of death due to HIV disease peaked in 1994 or 1995 (depending on the demographic group), decreased rapidly through 1997, and continued to decrease much more slowly thereafter.

- Persons dying of HIV disease increasingly consist of:
  - men (74.4% in 2019)
  - Blacks/African American persons (51% in 2019)
  - residents of the South (55% in 2019)
  - persons 45 years of age or older (75% in 2019)

- HIV disease continues to remain among the leading causes of death among all persons aged 25 to 44 years, ranking 11th in 2019.
  - As an underlying cause of deaths, HIV is particularly high among Black/African American persons aged 25 to 44 years, ranking the 7th leading cause among Black men and the 9th leading cause among Black women in 2019.
