CDC awarded $5.02M to health departments and community-based organizations in Kentucky for HIV prevention and care activities, including $1.99M in Ending the HIV Epidemic (EHE) funding.

CDC collects and disseminates data on 6 key EHE indicators. Current data are available online at AtlasPlus and on HHS AHEAD for each jurisdiction.

Kentuckians with HIV will face an average lifetime cost of $510,000 to treat their infection (2020 dollars).

**HIV Prevention to End the HIV Epidemic in the United States**

**KENTUCKY**

**DIAGNOSE:** Diagnose all people with HIV as early as possible

17% of Kentuckians with HIV are unaware of their status, which means they aren’t getting the HIV care they need.

340 new HIV infections occurred in Kentucky.

18,908 HIV tests were provided in Kentucky with CDC funding. HIV testing enables people to know their HIV status.

**How CDC Dollars Can Improve DIAGNOSES:**

- **Expand** routine screening of people in health care settings
- **Increase** testing in non-traditional settings (e.g., jails, emergency departments, street-based services)
- **Increase** access to and use of HIV self-tests
- **Integrate** STI and viral hepatitis screening into HIV testing services
CDC offers technical assistance and HIV prevention trainings to build workforce capacity. Nationally, learners from 216 unique organizations completed 565 HIV prevention courses with the most requested content area being increasing awareness of, access to, and adherence to PrEP.
