**Maryland**

**1,029 new cases**

Maryland had the nation’s 5th-highest rate of new HIV diagnoses in 2017.

**37,900 People with HIV**

When a person with HIV takes their medicine regularly they become virally suppressed and have effectively no risk of transmitting HIV. **48% of Marylanders with HIV are virally suppressed**; the national goal is 80%.

86% of Marylanders with HIV are aware of their status, which means approximately **5,300 people** in Maryland aren’t getting the care they need. The national goal for the percentage of people with HIV who know their status is 90%.

Marylanders with HIV will face an average lifetime cost of **$478,000** to treat their infection (2017 dollars).

Pre-exposure prophylaxis (PrEP) is a pill for those at high risk for HIV.

**27,390** Marylanders at high risk for HIV could potentially benefit from PrEP.

**2,015** Marylanders were prescribed PrEP in 2017.

*PrEP* Taken daily, it can block HIV.

HIV Testing

91,042 HIV tests†† were provided in Maryland

CDC-funded HIV testing ensures people at risk know their HIV status. Awareness of HIV status allows people who are HIV-negative to choose prevention activities to avoid infection.

HIV Diagnosis

258 Marylanders††† were newly diagnosed with HIV through CDC-funded HIV testing

CDC-funded HIV testing makes people with HIV aware of their infection so they can take medicine to stay healthy and prevent transmission.

Linkage to Care

175 Marylanders††† were linked to medical care within 90 days of HIV diagnosis

CDC-funded programs link people to medical care immediately after HIV diagnosis, so they can stay healthy and not transmit HIV to others.

What Can Be Done?

Major developments in HIV science, prevention, and treatment have produced a once-in-a-generation opportunity to eliminate new HIV infections in the United States — including Maryland.

To End HIV:

Use the right practices in the right places targeted to the right people

Diagnose

All people with HIV as early as possible after infection

Treat

All people with HIV rapidly so they can take HIV medicine to stay healthy and prevent transmission

Protect

People at risk for HIV with proven interventions, including medications that can prevent HIV

Respond

Rapidly to growing HIV networks and effectively respond to outbreaks of new HIV infections

Dedicated people at all levels working together to end HIV

For more information on HIV prevention, please visit www.cdc.gov/HIV

CDC awarded $15.4M†† to Maryland health departments and community-based organizations for HIV prevention activities, including:

†† FY 2018. ††† 2017 data.

Due to end of year data submission dates, those who were diagnosed and successfully linked to care during the last two weeks of the year may have been excluded from this calculation.
