2014 Standard Questionnaire for Medical Monitoring Project (MMP)

VERSION 10.3.0

Public reporting burden of this collection of information is estimated to average 45 minutes per response, including the time for reviewing instructions, searching existing data sources, gathering and maintaining the data needed, and completing and reviewing the collection of information. An agency may not conduct or sponsor, and a person is not required to respond to a collection of information unless it displays a currently valid OMB control number. Send comments regarding this burden estimate or any other aspect of this collection of information, including suggestions for reducing this burden to: CDC, Project Clearance Officer, 1600 Clifton Road, MS D-74, Atlanta, GA 30329, ATTN: PRA (0920-0740). Do not send the completed form to this address.

General notes for QDS programmer

Additional programming notes are located throughout the questionnaire:

- 1) Use version 2.6.1 of QDS.
- 2) Every question requires a response to move forward in the application unless otherwise noted.
- 3) Use the following values: .D = 8, .R = 7, NA = 6.
- 4) For all “other-specify” variables in “check all that apply” questions, use the “other” variable name (which should end in “O”) and add an “S” on the end. If the variable name becomes too long, then drop the letter immediately preceding the consecutive letter at the end of the **main part** of the variable name. For example, if the “other” variable is named “KINDG_9O”(where *KIND* is the stem variable name and *G* denotes the lettered response option) the “specify” variable should be named “KING_9OS”
- 5) QDS programming notes are not included in the application; they are merely there to help with coding.
- 6) Interviewer instructions and inconsistency checks are notes for the interviewers, but may also include coding instructions.
- 7) The QDS codebook should have a brief description of the variable. This includes all calculated variables.
- 8) Calculate questionnaire version number using variable name **VERSION**. This must be updated every time a change is made in the application.
- 9) Calculate QDS version number using variable name **QDSVERN3**. This variable describes the QDS version used to create the QAD file. For 2014 cycle the value is 2.6.1.
- 10) Calculate data collection cycle using variable name **CYCYR**. CYCYR = 2014.
- 11) For all date variables also create an automatic variable that is a copy of the date variable. For example, if the variable for date was called DATE, then the automatic variable would look like: a. variable name: TXFORM, b. type of date: String Expression, c. numeric calculation/string expression: DATE
- 12) Label module sections in the codebook. Use the Table of Contents for guidance.
- 13) PDP start date is January 1, 2014.
- 14) PDP end date is April 30, 2014.
- 15) Calculate the time to conduct an interview from D1 to C20 (i.e., exclude Preliminary Information and Interview Completion sections).
- 16) Calculate time to conduct each module.
- 17) Do not include the Response cards and calendars in the QDS program.
- 18) Distinguish between English and Spanish versions of the questionnaires.
- 19) The maximum size of text values is 100 except for E5 which is 200.

Preliminary Information (I)

Interviewer instructions: Enter Preliminary Information prior to interview.

Participant ID [PARID]:

- I1a. **Site ID [SITEID]** _____
I1b. **Facility ID [FACILID]** _____
I1c. **Respondent ID [INDID]** _____

QDS programming note:

Site ID, Facility ID, and Respondent ID all must be 4 digits with leading 0s. **[PARID]** is a 12 digit calculated variable based on **[SITEID]** + **[FACILID]** + **[INDID]**
Range 1–9999

- I1d. **The Participant ID is** _____/_____/_____. **Is that correct? [IDCONF3]**
No 0 **Return to I1a**
Yes 1

QDS programming note: Enter PARID for question. If I1d is “No,” loop back to I1a. Display for interviewer should include dashes after every 4th number for legibility (e.g., “The participant ID is 1111-2222-3333. Is that correct?” DO NOT create a new variable reflecting PARID. Display when I1d is NO should read: “Interviewer: Please re-enter participant ID.”

- I2. **Interviewer ID:** _____ **[INTID]**

QDS programming note for I2: Range 1–999

- I3. **Computer device ID:** _____ **[DEVICEID]**

QDS programming note for I3: Range 1–999

- I4. **Interview date:** _____/_____/_____
[IDATE] (M M / D D / Y Y Y Y)

QDS programming note for I4: Automatically calculate in QDS.

- I5. **Are you conducting a telephone interview or face-to-face interview? [TI_F2F]**

Telephone interview 1
Face-to-face interview 2

- I6. **Was the interview originally administered on paper? [MODEADM]**

No.....	<input type="checkbox"/>	0
Yes.....	<input type="checkbox"/>	1

Demographics (D)

SAY: “I’d like to thank you for taking part in this interview. Remember that all the information you give me will be confidential and your name won’t be recorded in the survey responses. The answers to some questions may seem obvious to you, but I need to ask you all of the questions.”

Interviewer instructions: If I5 [TI_F2F] is “telephone interview,” then go to Say box below; otherwise skip to D1.

SAY: “You have chosen to complete the interview over the telephone. Before we begin, I would like to remind you that there is a set of response cards that I will ask you to refer to throughout the course of the interview. These response cards will be needed for some of the questions you will be asked during the interview. The set of cards contains a calendar, some pictures, and text to help guide you through the response options for some of the questions. Each card is labeled. Please keep this set of response cards nearby so you can use them when needed. I will let you know which questions require response cards and the label that corresponds to the card that is needed.”

- D1. Have you **ever** participated in the MMP interview? [PARTCPT]
- No 0 \implies Skip to D2
- Yes 1
- Refused to answer..... 7 \implies Skip to Say box before D2
- Don’t know 8 \implies Skip to D2

- D1a. What month and year did you participate in the MMP interview? [PARTIC]

$\frac{\text{M M}}{\text{Y Y Y Y}}$

[Month: 77 = Refused to answer, 88= Don’t know;
Year: 7777 = Refused to answer, 8888 = Don’t know]

Interviewer instructions: If the respondent does not know the month, code this date as Don’t know.

Inconsistency check: D1a (date respondent participated in MMP) cannot be earlier than January 2005 or later than I4 (interview date).

QDS programming note for D1a: This requires a full response for month and year.

D1b. In what city were you interviewed?

_____ (City) [CITY_9]

[7 = Refused, 8 = Don't know]

D1c. In what state were you interviewed?

_____ (State) [STATE_9]

[7 = Refused, 8 = Don't know]

Interviewer instructions: If D1a [PARTIC] is during the 2014 data collection cycle, or "Refused to answer," go to Say box before D2; otherwise, skip to D2.

QDS programming note for Interviewer instructions after D1c: parameters for the 2014 data collection cycle are May 1, 2014 to I4 (interview date).

SAY: "We are only interviewing people who haven't already been interviewed during 2014 (2015). Thank you very much for your time." [DISCONTINUE INTERVIEW AND SKIP TO INTERVIEW COMPLETION.]

QDS programming note for Say box after D1c: use 2014 if the year in I4 (date of interview) is 2014. Use 2015 if the year in I4 (date of interview) is 2015.

D2. Please tell me the month and year of your date of birth? [DOB_13]

$\frac{\text{M}}{\text{M}} / \frac{\text{Y}}{\text{Y}} \frac{\text{Y}}{\text{Y}} \frac{\text{Y}}{\text{Y}}$

[Month: 77 = Refused to answer, 88 = Don't know;
Year: 7777 = Refused to answer, 8888 = Don't know]

Interviewer instructions: If D2 [DOB_13] is less than 18 years prior to January 1, 2014 skip to say box before D3. If D2 is "Refused to answer" or "Don't know," or if D2 is 18 years and 0-11 months prior to January 1, 2014 go to D2a; otherwise, skip to D3.

Inconsistency check: D2 [DOB_13] cannot be earlier than January 1, 1900 or later than the I4 (interview date).

QDS programming note for D2: This requires a full response for month and year. Use the 1st of the month to calculate age.

- D2a. Were you at least 18 years old on January 1, 2014? **[AGE_VER1]**

Access to Care (A)

HIV Testing and Care Experiences

SAY: “Now I’m going to ask you some questions about getting tested for HIV.”

(M M / Y Y Y Y)

*[Month: 77 = Refused to answer, 88= Don’t know;
Year: 7777 = Refused to answer, 8888 = Don’t know]*

Inconsistency check: A1 (date first tested positive for HIV) cannot be earlier than D2 [DOB_13]. If A1 is earlier than March 1985 or later than April 30, 2014, the PDP end date, confirm response.

QDS programming note for inconsistency check after A1: If A1 is earlier than D2 [DOB_13], display message: “The date first tested positive for HIV cannot be earlier than respondent’s date of birth. Please re-enter date.” Then, loop back to A1. If A1 is earlier than 03/1985, display note to the interviewer: “The date entered is earlier than 03/1985 (date of first FDA-approved HIV test). Confirm date of HIV test. Go back to previous question to confirm date.” Program should move forward regardless of date. Allow a blank response for month. If A1 is later than April 30, 2014, display note to interviewers: “The date entered is after 04/30/2014 (PDP end date). Go back to previous question to confirm date of HIV test.” The program will then go to the Say box before A2.

Interviewer instructions: If A1 (date first tested positive for HIV) is after April 30, 2014, go to the Say box before A2. If A1 is “Refused to answer” or “Don’t know,” skip to A7. If A1 (date first tested positive for HIV) is within 12 months of I4 (interview date), go to A2; otherwise skip to instructions before A3.

Sexual Behavior (S)

Total sex partners (ST)

SAY: “Next, I’m going to ask you some questions about sex. Please remember that your answers will be kept confidential and that you don’t have to answer any questions that you don’t want to. I’ll ask you about the number of people you had sex with during the **past 12 months**. When I say “sex,” I mean vaginal or anal sex. Vaginal sex means penis in the vagina and anal sex means penis in the anus. When thinking about your answers, please include anyone whom you had vaginal or anal sex with during the **past 12 months**. The number of people could range anywhere from 0 to over a hundred.”

Calculated variable for sex gender:

SX_GEN=

If GENDER=Male and BIRTGEN=Male then SX_GEN=1 (Male).

If GENDER=Female and BIRTGEN=Female then SX_GEN=2 (Female).

If (GENDER=Male and BIRTGEN=Female) or (GENDER=Female and BIRTGEN=Male) or (GENDER=Transgender and [BIRTGEN=Male, Female, don’t know, or refused to answer]) then SX_GEN=3 (Transgender).

If BIRTGEN is intersex, then SX_GEN=4 (Indeterminate).

If ([GENDER= refused to answer or don’t know] and [BIRTGEN = Male, Female, refused to answer, or don’t know]), then SX_GEN=4 (Indeterminate).

If BIRTGEN is refused to answer or don’t know, and GENDER is male, female, refused to answer, or don’t know, then SX_GEN=4 (Indeterminate).

In other words:

Variable label for SX_GEN=sex gender						

Interviewer instructions for SX_TFPN4 (number of female partners):
 If SX_GEN=2 (Female), skip to SX_TMPN4 (number of male partners).
 Else, go to SX_TFPN4 (number of female partners).

ST.1.0. During the **past 12 months**, how many females have you had sex with? [SX_TFPN4]

___ ___ ___ [7777 = Refused to answer, 8888 = Don't know]

QDS programming note for SX_TFPN4 (number of female partners):
 Range is 0–999.
 Variable label for SX_TFPN4 is number of female partners.

ST.2.0. During the **past 12 months**, how many males have you had sex with? [SX_TMPN4]

___ ___ ___ [7777 = Refused to answer, 8888 = Don't know]

QDS programming note for SX_TMPN4 (number of male partners):
 Range is 0–999.
 Variable label for SX_TMPN4 is number of male partners.

ST.3.0. During the **past 12 months**, how many transgender persons have you had sex with?
 [SX_TTPN4]

___ ___ ___ [7777 = Refused to answer, 8888 = Don't know]

QDS programming note for SX_TTPN4 (number of transgender partners):
 Range is 0–999.
 Variable label for SX_TTPN4 is number of transgender partners.

Calculated variables for SX_TFPN4 (number of female partners), SX_TMPN4 (number of male partners), and SX_TTPN4 (number of transgender partners):

Total number of vaginal and anal sex partners: create a calculated variable SX_TOTN4 where the sum of SX_TFPN4 + SX_TMPN4 + SX_TTPN4 = SX_TOTN4. Variable label for SX_TOTN4 is

total number of vaginal and anal sex partners. If the response to SX_TFPN4 (number of female partners), SX_TMPN4 (number of male partners), or SX_TTPN4 (number of transgender partners) is “don’t know,” or “refused to answer,” then calculate the response as “0.”

EXAMPLE: if SX_TFPN4 = “don’t know” AND SX_TMPN4 = “don’t know,” AND SX_TTPN4 = “refused to answer,” THEN SX_TOTN4 = 0. If any of the values are skipped (.S), then do not include the value in the calculation. EXAMPLE: if SX_TFPN4 = “2” AND SX_TMPN4 = “don’t know,” AND SX_TTPN4 = skipped, then SX_TOTN4 = 2.

Female only partners: create a calculated variable SXFMONN4 (female only partners) if SX_TMPN4 (number of male partners) = 0, don’t know, or refused to answer AND SX_TTPN4 (number of transgender partners) = 0, don’t know, or refused to answer AND SX_TFPN4 (number of female partners) ≥ 1, then SXFMONN4 (female only partners) = 1; otherwise SXFMONN4 = 0. Variable label for SXFMONN4 is female only partners.

Male only partners: create a calculated variable SXMLONN4 (male only partners) if SX_TFPN4 (number of female partners) = 0, don’t know, or refused to answer or skipped AND SX_TTPN4 (number of transgender partners) = 0, don’t know, or refused to answer AND SX_TMPN4 (number of male partners) ≥ 1, then SXMLONN4 (male only partners) = 1; otherwise SXMLONN4 = 0. Variable label for SXMLONN4 is male only partners.

Transgender only partners: create a calculated variable SXTGONN4 (transgender only partners) if SX_TFPN4 (number of female partners) = 0, don’t know, or refused to answer AND SX_TMPN4 (number of male partners) = 0, don’t know, or refused AND SX_TTPN4 (number of transgender partners) ≥ 1, then SXTGONN4 (transgender only partners) = 1; otherwise SXTGONN4 = 0. Variable label for SXTGONN4 is transgender only partners.

Interviewer instructions for SX_TWPN4 (number of female-female partners):

If SX_GEN=2 (Female), go to Say Box before SX_TWPN4 (number of female-female partners).

If SX_GEN is not 2 (Female) and SX_TOTN4 (total number of sex partners) = 0, skip to Say box before SEROSRT1 (serosorting).

QDS programming note for SX_TWPN4 (number of female-female partners):

Range is 0–999.

Variable label for SX_TWPN4 is number of female-female partners.

Female-female only partners: create a calculated variable SXFFONN4 (female-female only partners) if SX_TWPN4 (number of female-female partners) = 0, don't know, or refused AND SX_TTPN4 (number of transgender partners) = 0, don't know, refused AND SX_TWPN4 (number of female-female partners) ≥ 1, then SXFFONN4 (female-female only partners) = 1; otherwise SXFFONN4 = 0. Variable label of SXFFONN4 is female-female only partners.

Interviewer instructions before SX_EXCN4 (exchange sex):

Women who only had sex with women: If SX_GEN=2 AND SX_TMPN4 (number of male partners) = "0," "don't know," or "refused to answer," AND SX_TTPN4 (number of transgender partners) = "0," "don't know," or "refused to answer," skip to the serosorting section (Say box before SEROSRT1).

No vaginal or anal sex partners: If SX_TFPN4 (number of female partners), SX_TMPN4 (number of male partners), and SX_TTPN4 (number of transgender partners) are all some combination of "0," "don't know," or "refused to answer," then skip to the serosorting section (Say box before SEROSRT1).

Otherwise, go to SX_EXCN4 (exchange sex).

Exchange sex (SE)

SE.1.0. During the **past 12 months**, did you have sex in exchange for things like food, shelter, transportation, money, or drugs? [SX_EXCN4]

- No..... 0
- Yes..... 1
- Refused to answer 7
- Don't know..... 8

QDS programming note for SX_EXCN4:

Variable label for SX_EXCN4 is exchange sex.

Names of partners (SN)

Interviewer instructions before SX_NM1N4 (name of partner 1): If SX_TOTN4 (total number of sex partners) = 1, go to Say box #1 before SX_NM1N4 (name of partner 1). If SX_TOTN4 ≥ 2, skip to Say box #2 before SX_NM1N4 (name of partner 1).

Say box #1 before SX_NM1N4 (name of partner 1):

SAY: “Now I’m going to ask you some questions about the person that you recently had sex with during the **past 12 months**, such as his or her age and race. Please answer to the best of your knowledge, but it is okay to tell me that you don’t know or that you’re unsure. Since I’ll be asking questions about this person, I need some way to refer to him or her. You may refer to him or her in any way you want—initials, nickname, or where you met. However, please don’t provide a last name or any other identifying information.”

Interviewer instructions after Say box #1 before SX_NM1N4 (name of partner 1):
Skip to SX_NM1N4 (name of partner 1).

Say box #2 before SX_NM1N4 (name of partner 1):

SAY: “Now I’m going to ask you some questions about the *[IF SX_TOTN4 (total number of sex partners) is 2, 3, or 4, THEN INSERT RESPONSE FROM SX_TOTN4 (total number of sex partners). IF SX_TOTN4 (total number of sex partners) ≥ 5, THEN INSERT “5.”]* people you recently had sex with during the **past 12 months**, such as their age and race. Please answer to the best of your knowledge, but it is okay to tell me that you don’t know or that you’re unsure. Since I’ll be asking questions about each person, I need some way to refer to them, so that when I ask you follow-up questions, we both know we’re talking about the same person. You may refer to them in any way you want—initials, nicknames, or where you met. However, please don’t provide last names or any other identifying information.”

SN.1.0. What shall we call the person with whom you most recently had sex during the **past 12 months**? [SX_NM1N4]

_____ [7 = Refused to answer]

Interviewer instructions for SX_NM1N4 (name of partner 1):

If SX_NM1N4 (name of partner 1), is “refused to answer,” display the message “Interviewer: remind the respondent that he or she can provide initials, nicknames, or another name to identify the partner.” Allow program to move forward.

If SX_TOTN4 (total number of sex partners) = 1 AND SX_NM1N4 (name of partner 1), is still “refused to answer,” skip to the serosorting section (Say box before SEROSRT1). If SX_TOTN4

(total number of sex partners) \geq 2, go to SX_NM2N4 (name of partner 2). Else, go to SXTOVRN4 (verification of total sex partners)

QDS programming note for SX_NM1N4:

Open-ended response.
Character limit = 50.
Do not allow a “don’t know” response option.
Variable label is name of partner 1.

SN.1.1. What shall we call the 2nd person with whom you had sex during the **past 12 months**?
[SX_NM2N4]

_____ [7 = Refused to answer]

Interviewer instructions for SX_NM2N4 (name of partner 2):

If SX_NM2N4 (name of partner 2) is “refused to answer,” display the message “Interviewer: remind the respondent that he or she can provide initials, nicknames, or another name to identify the partner.” Allow program to move forward.

If SX_TOTN4 (total number of sex partners) = 2 AND SX_NM1N4 (name of partner 1) AND SX_NM2N4 (name of partner 2) are “refused to answer,” skip to the serosorting section (say box before SEROSRT1). If SX_TOTN4 \geq 3, go to SX_NM3N4 (name of partner 3). Else, go to SXTOVRN4 (verification of total sex partners)

EXAMPLE: SX_NM1N4 (name of partner 1) is “refused to answer” AND SX_NM2N4 (name of partner 2) is “John,” then go to SX_NM3N4 (name of partner 3).

QDS programming note for SX_NM2N4:

Use open-ended response.
Character limit = 50.
Do not allow for a “don’t know” response option.
Variable label is name of partner 2.

If SX_NM1N4 (name of partner 1) and SX_NM2N4 (name of partner 2) are identical, then display the following message, “You gave me the same name for another partner. Can you please give me another name?” The program should return to SX_NM2N4 (name of partner 2).

SN.1.2. What shall we call the 3rd person with whom you had sex during the **past 12 months**?
[SX_NM3N4]

_____ [7 = Refused to answer]

Interviewer instructions for SX_NM3N4 (name of partner 3):

If SX_NM3N4 (name of partner 3) is “refused to answer,” display the message “Interviewer: remind the respondent that he or she can provide initials, nicknames, or another name to identify the partner.” Allow program to move forward.

If SX_TOTN4 (total number of sex partners) = 3 AND SX_NM1N4 (name of partner 1) AND SX_NM2N4 (name of partner 2) AND SX_NM3N4 (name of partner 3) are “refused to answer,” skip to the serosorting question (say box before SEROSRT1). If SX_TOTN4 (total number of sex partners) ≥4, go to SX_NM4N4 (name of partner 4). Else skip to SXTOVRN4 (verification of total sex partners)

EXAMPLE: SX_NM1N4 (name of partner 1) is “refused to answer” AND SX_NM2N4 (name of partner 2) is “John” and SX_NM3N4 (name of partner 3) is “Jane,” then go to SX_NM4N4 (name of partner 4).

QDS programming note for SX_NM3N4:

Use open-ended response.

Character limit = 50.

Do not allow for a “don’t know” response option.

Variable label is name of partner 3.

If either SX_NM1N4 (name of partner 1), SX_NM2N4 (name of partner 2), or SX_NM3N4 (name of partner 3) are identical, then display the following message, “You gave me the same name for another partner. Can you please give me another name?” The program should return to SX_NM3N4 (name of partner 3).

SN.1.3. What shall we call the 4th person with whom you had sex during the **past 12 months?**

[SX_NM4N4]

_____ [7 = Refused to answer]

Interviewer instructions for SX_NM4N4 (name of partner 4):

If SX_NM4N4 (name of partner 4), is “refused to answer,” display the message “Interviewer: remind the respondent that he or she can provide initials, nicknames, or another name to identify the partner.” Allow program to move forward.

If SX_TOTN4 (total number of sex partners) = 4 AND SX_NM1N4 (name of partner 1) AND SX_NM2N4 (name of partner 2) AND SX_NM3N4 (name of partner 3) AND SX_NM4N4 (name of

partner 4) are “refused to answer,” skip to the serosorting section (Say box before SEROSRT1. If SX_TOTN4 (total number of sex partners) ≥5, go to SX_NM5N4 (name of partner 5). Else, skip to SXTOVRN4 (verification of total sex partners)

EXAMPLE: SX_NM1N4 (name of partner 1) is “refused to answer” AND SX_NM2N4 (name of partner 2) is “John” and SX_NM3N4 (name of partner 3) is “Jane” and SX_NM4N4 (name of partner 4) is “JB,” then go to SX_NM5N4 (name of partner 5).

QDS programming note for SX_NMN4:

Use open-ended response.

Do not allow for a “don’t know” response option.

Variable label is name of partner 4.

If either SX_NM1N4 (name of partner 1), SX_NM2N4 (name of partner 2), SX_NM3N4 (name of partner 3), or SX_NM4N4 (name of partner 4) are identical, then display the following message, “You gave me the same name for another partner. Can you please give me another name?” The program should return to SX_NM4N4 (name of partner 4).

SN.1.4. What shall we call the 5th person with whom you had sex during the **past 12 months?**

[SX_NM5N4]

_____ [7 = Refused to answer]

Interviewer instructions for SX_NM5N4 (name of partner 5):

If SX_NM5N4 (name of partner 5), is “refused to answer,” display the message “Interviewer: remind the respondent that he or she can provide initials, nicknames, or another name to identify the partner.” Allow program to move forward.

If SX_TOTN4 (total number of sex partners) = 5 AND SX_NM1N4 (name of partner 1), SX_NM2N4 (name of partner 2), SX_NM3N4 (name of partner 3), SX_NM4N4 (name of partner 4), SX_NM5N4 (name of partner 5) are all “refused to answer,” skip to the serosorting section (Say box before SEROSRT1).

Otherwise go to SXTOVRN4 (verification of total sex partners).

QDS programming note for SX_NM5N4:

Use open-ended response.

Character limit = 50.

Do not allow for a “don’t know” response option.

Variable label is name of partner 5.

If either SX_NM1N4 (name of partner 1), SX_NM2N4 (name of partner 2), SX_NM3N4 (name of partner 3), SX_NM4N4 (name of partner 4), or SX_NM5N4 (name of partner 5) are identical, then display the following message, "You gave me the same name for another partner. Can you please give me another name?" The program should return to SX_NM5N4 (name of partner 5).

If SX_TOTN4 (total number of sex partners) > 5 and SX_NM1N4 (name of partner 1), SX_NM2N4 (name of partner 2), SX_NM3N4 (name of partner 3), SX_NM4N4 (name of partner 4), and SX_NM5N4 (name of partner 5) are all "don't know" or "refused to answer," then skip to the *aggregate information section (Say box before SXAGC1N4)*.

Instructions for vaginal sex partner-by-partner series table: The questions and response options are in the far left column of the table. Each question is asked for partners 1–5. Partners 1-5 are labeled in columns Partner 1, Partner 2, Partner 3, Partner 4, and Partner 5. All Partner 1 questions are asked before moving to Partner 2 questions. Detailed instructions are provided in each table cell.

When question instructions say “insert partner name,” and the variable is in the Partner 1 column, then insert response from SX_NM1N4 (name of partner 1).

When question instructions say “insert partner name,” and variable is in the Partner 2 column, insert response to SX_NM2N4 (name of partner 2).

When question instructions say “insert partner name,” and variable is in the same column as Partner 3, insert response to SX_NM3N4 (name of partner 3).

When question instructions say “insert partner name,” and variable is in the same column as Partner 4, insert response to SX_NM4N4 (name of partner 4).

When question instructions say “insert partner name,” and variable is in the same column as Partner 5, insert response to SX_NM5N4 (name of partner 5).

Interviewer instructions before SX_VS1N4 (vaginal-partner 1), SX_VS2N4 (vaginal-partner 2), SX_VS3N4 (vaginal-partner 3), SX_VS4N4 (vaginal-partner 4), and SX_VS5N4 (vaginal-partner 5):

Aggregate information (SA)

SAY: “We just talked about the five people you most recently had sex with. Now I’d like to ask you about the other partner(s) with whom you had sex with during the **past 12 months**. For these next questions, please don’t include partners you have already discussed.”

Interviewer instructions before SXAGC1N4 (aggregate condom use 6 partners):
If respondent reported 7 or more sex partners ($SX_TOTN4 \geq 7$), then skip to SXAGC2N4 (aggregate condom use-more than 6 partners). If respondent reported 6 partners ($SX_TOTN4=6$), go to SXAGC1N4 (aggregate condom use- 6 partners).

SA.1.0. During the **past 12 months**, was a condom always used when you had vaginal or anal sex with your other partner? [SXAGC1N4]

- No 0
Yes 1
Refused to answer 7
Don’t know..... 8

QDS programming note for SXAGC1N4 (aggregate condom use 6 partners):
Variable label is aggregate condom use-6 partners.

SA.1.1. Was your other partner HIV positive? [SXAGP1N4]

- No 0
Yes 1
Refused to answer 7
Don’t know..... 8

QDS programming note for SXAGP1N4 (aggregate partner status-6 partners):
Variable label is aggregate partner status-6 partners.

Interviewer instructions after SXAGP1N4 (aggregate partner status-6 partners):
Skip to the serosorting section (Say box before SEROSRT1).

SA.1.2 During the **past 12 months**, with how many of these [INSERT SX_TOTN4-5] other partners was a condom always used when you had vaginal or anal sex? [SXAGC2N4]

___ ___ ___ [7777 = Refused to answer, 8888 = Don’t know]

QDS programming note for SXAGC2N4 (aggregate condom use-more than 6 partners):
Range is 0–999.

Variable label is aggregate condom use-more than 6 partners.

If SXAGC2N4 (aggregate condom use-more than 6 partners) is greater than **SX_TOTN4-5** then display the following: “The number of additional partners with whom you used a condom cannot be greater than [insert value from SX_TOTN4-5]. Confirm Answer.” Go back to SXAGC2N4 (aggregate condom use-more than 6 partners).

Calculated variable SXAGUPN4: Create a calculated variable to indicate the aggregate number of partners with whom the respondent had unprotected sex. If SX_TOTN4 is > 5, then create SXAGUPN4 where (SX_TOTN4-5)-SXAGC2N4. (If SXAGC2N4 is don’t know or refuse, assign it a 7777 if refused or 8888 if don’t know.)

Variable label is aggregate number of unprotected sex partners.

Interviewer instructions for SXAGC2N4 (aggregate condom use more than 6 partners): If SXAGC2N4 (aggregate condom use more than 6 partners) = SX_TOTN4-5 (total number of partners-5), “don’t know,” or “refused to answer,” then skip to the serosorting section (Say box before SEROSRT1). Otherwise, go to SXAGC3N4 (aggregate condom use-more than 6 partners).

SA.1.3 So, you had unprotected sex with **[INSERT RESPONSE FROM SXAGUPN4]** of these other partners? **[SXAGC3N4]**

- No..... 0
- Yes..... 1
- Refused to answer 7
- Don’t know..... 8

QDS programming note for SXAGC3N4 (aggregate unprotected sex-more than 6 partners):

Variable label is aggregate unprotected sex-more than 6 partners.

If SXAGC3N4 (aggregate unprotected sex-more than 6 partners) is “no,” “refused to answer” or “don’t know,” then return to SXAGC2N4 (aggregate condom use-more than 6 partners).

SA.1.4 How many of those **[INSERT RESPONSE FROM SXAGUPN4]** other partners were HIV positive? **[SXAGP2N4]**

___ ___ ___ **[7777 = Refused to answer, 8888 = Don’t know]**

QDS programming note for SXAGP2N4 (aggregate concordant partners-more than 6 partners):

Range is 0–999.

SXAGP2N4 cannot be greater than SXAGUPN4. If SXAGP2N4 > SXAGUPN4, then display the following message, “The response is out of range” and return to SXAGP2N4 (aggregate

concordant partners-more than 6 partners).
Variable label for SXAGP2N4 is aggregate concordant partners-more than 6 partners.
