

CDC Immunization Information Systems (IIS) Vaccine Code Set Release Notes

Vaccine Code Set Update Publication Date: September 18, 2026

The individual filenames included in this distribution contain the publication date (20260918)

Release Notes: Release notes provide a technical summary of the updates made to vaccine code sets and crosswalks. This code set release includes updates for all regular vaccine-related codes. It does not include updates to codes for Vaccine Information Statements (VIS).

General Note Regarding This Release: Codes with “Last Update” dates from August 20, 2026, and before September 18, 2026, reflect the changes and additions in this release.

CDC adds, retires, and takes other actions regarding National Drug Code (NDC) codes, Current Procedural Terminology (CPT) codes, and supporting information into the CDC Vaccine Code Sets upon receiving and processing the necessary information from the manufacturers, FDA, AMA, and NIH, among other data partners. This processing of codes into relational, cross-walked code sets enables vaccines to be actionable, for ordering, inventorying, administering, documenting, billing, reporting, and other purposes as applicable.

Note: A technical issue, that was mentioned as recently as the Vaccine Code Set Release Notes of August 20, 2026, has been addressed. This vaccine code set release resumes publication via the Runtime REST Web Services and Viewpoint Browser access methods (please see the end of this document on how to access these methods).

Release Summary

This release includes vaccine code set updates related to the following:

1. **New Fall 2026 COVID-19 Vaccine Codes and Crosswalks**
2. **New Flucelvax Relabeler NDCs**
3. **Retired NDC Codes**
4. **Minor Correction to CVX Code**
5. **NDC Code Date of Last Update Changes**

Detailed technical Release Notes are provided upon the publication of a vaccine code set. You may find the date of the most recent code set publication and a downloadable PDF version of the Release Notes on the page found here: www.cdc.gov/iis/code-sets/index.html.

You may subscribe to receive future email vaccine code set updates via the sign up at the bottom of the webpage (www.cdc.gov/iis/code-sets/index.html).

4. Minor Correction to CVX Code

A minor correction to CVX code 303 was made to change the CDC Internal ID field to 313 from 274. This removed a duplicate internal ID.

5. NDC Codes – Changes to Date of Last Update

A technical issue (that has since been addressed as mentioned on above) affected recent FDA NDC data files. CDC uses these FDA NDC data files to populate the NDC data in the Vaccine Code Set database. While the technical issue does not affect the fields used in the CDC published code set release and Release Notes on its website, this technical issue caused the date of last update to be changed for a large number of records with no other content changes.

The NDC records affected by this technical issue are listed below, and have the date of last update of 09/01/2026.

CDC Immunization Information Systems (IIS) Vaccine Code Set Release Notes

Additionally, products showing (***) in the first column had a change of last update of 09/02/2026, but no content changes.

CDC Immunization Information Systems (IIS) Vaccine Code Set Release Notes

Access to CDC Vaccine Code Sets

CDC provides additional methods to access the vaccine codes in addition to the files and content found on CDC's Vaccine Code Sets website here: <https://www.cdc.gov/iis/code-sets/index.html>.

You are encouraged to explore the following additional methods available here: <https://www.cdc.gov/iis/code-sets/viewpoint-rest.html>:

- The **Viewpoint Vaccine Code Set Browser** provides dynamic browse and search capabilities against the entire Vaccine Code Set.
- The **Runtime REST Web Service** provides improved access to Vaccine Code Sets data by providing a way for development teams and other technical users to query and receive vaccine code data via API.
- The **Content Cloud Portal** provides delivery and download of desired reports. Access and file subscriptions are managed by registration.

For questions or need further assistance with any of the additional methods mentioned above please email iisinfo@cdc.gov.
