Advice for Parents on Talking to Children About the Flu

Focus on what your child can do to fight the flu and to not spread flu to others:

- Have your child get a flu vaccine. The flu shot may pinch, but it will help protect them from getting sick later. A flu vaccine given as a nasal spray may also be available.

- Encourage them to try to stay away from people who are sick.

- Encourage them to cough and sneeze into a tissue when they are sick. Throw the tissue in the trash right away. If they do not have a tissue, they should cover their mouth and nose with their arm.

- Encourage them to wash hands often with soap and warm water for 15-20 seconds. Set a good example by doing this yourself.

- Encourage them to stay home from work and school if they are sick, and stay away from people until they are better.
Encourage healthy habits: eating healthy foods, getting enough sleep, and getting exercise.

Use their questions as a chance to tell them how to avoid the flu and how to not spread flu and other germs.
