# Infection Control Assessment and Response (ICAR) Tool for General Infection Prevention and Control (IPC) Across Settings

## Section 1: Facility Demographics and Infection Prevention and Control (IPC) Infrastructure Acute Care Hospital/Critical Access Hospital

General Facility Demographics and IPC Infrastructure				
Date of Assessment:				
Facility Name:	ne:			
State/Territory:	County:			
Zip Code: State/Territory-assigned Unique	de: State/Territory-assigned Unique ID (if applicable):			
Facility type (Complete the demographic form that corresponds to the type of facility):	NHSN Facility Organization ID (if applicable):			
Acute Care Hospital / Critical Access Hospital Long-term Care Outpatient/Ambulatory Care Other ( <i>specify</i> ):	CMS Facility ID (if applicable):			
Facility Respondent Name(s) and Job Title(s):				
Rationale for assessment:				
Requested by facility Requested by accrediting agency/ licensing organization Requested by state or local health department HAI prevention focused: CAUTI CLABSI SSI CDI Other ( <i>specify</i> ):				
Prevention collaborative (specify partners):				
Outbreak (specify):				
Other (specify):				

Obtain a list of products used for cleaning and disinfection of environmental surfaces and non-critical patient/resident care equipment in the facility

EPA registration number(s) for products used in patient/resident rooms:

EPA registration number(s) for products used in common areas:

EPA registration number(s) for products used on non-critical patient/resident care equipment (e.g., blood glucose meters):

U.S. Department of Health and Human Services Centers for Disease Control and Prevention

- 1. Does the facility have access to **onsite** IPC expertise?
  - Yes No Unknown Not Assessed

#### If YES, specify:

Healthcare epidemiologist (number of full-time equivalents **dedicated** to IPC activities):

Infection preventionist (number of full-time equivalents dedicated to IPC activities):

Other (specify, including number of full-time equivalents **dedicated** to IPC activities):

**Note:** This is intended to identify individuals who work onsite at the facility or provide IP oversight at satellite locations (e.g., hospital IP provides IP oversight to affiliated outpatient clinics) and what proportion of their time is dedicated to IPC activities. Example: The facility has two IPs. IP #1 spends 25% of their time on IPC activities and the rest of their time on direct patient care and IP #2 spends 75% of their time on IPC activities and the rest of the rest of the time on direct patient care. This would be recorded as IP: 1 FTE dedicated to IPC activities. This breakdown could be further described in the notes.

2. Does the facility have access to offsite IPC expertise?

Yes No Unknown Not Assessed

#### If YES, specify:

Healthcare epidemiologist (number of full-time equivalents dedicated to IPC activities at the facility):

Infection preventionist (number of full-time equivalents dedicated to IPC activities at the facility):

Other (specify, including number of full-time equivalents dedicated to IPC activities at the facility):

Note: This is intended to identify individuals who do not work primarily onsite at the facility but might provide IPC support on a contractual or part-time basis. If a full-time equivalent cannot be determined, the level of support should be described in the notes.

3. Does the person(s) charged with directing the IPC program at the facility hold a nationally recognized credential in infection control (e.g., a-IPC, CIC, LTC-CIP, BCIDP)?

Yes No Unknown Not Assessed

Lack of certification does not mean that an individual is not qualified to direct the IPC program. **Describe their qualification(s)** (e.g., other certifications, specialized training):

4. What additional duties are performed by personnel within the IPC program? (select all that apply)

Occupational Health Education of personnel Safety officer Administrative (e.g., Director of Nursing) None Not assessed Other (specify):

5. What does the director of the IPC program believe are the current strengths and weaknesses in the IPC program?

6. Does the IPC program have access to electronic medical records of patients/residents?

Yes No Unknown Not Assessed

7. Does the IPC program utilize data mining/reporting software?

Yes No Unknown Not Assessed

8. Does the IPC program perform an annual facility infection risk assessment that evaluates and prioritizes potential risks for infections, contamination, and exposures and the program's preparedness to eliminate or mitigate such risks?

Yes No Unknown Not Assessed

- **9.** Are written infection control policies and procedures available, current, and based on evidence-based guidelines (e.g., CDC/HICPAC), regulations, or standards?
  - Yes No Unknown Not Assessed

9a. How frequently are policies and procedures reviewed and updated? (select all that apply)

nnually	
very three years	
s needed when new guidelines or evidence is published (e.g., via subscription with a publisher)	
nknown	
ot assessed	
ther (specify):	

**Note:** Facilities should have a schedule to regularly review policies and procedures to ensure they are current. At a minimum, updates should be made when new evidence-based guidance is published and if the scope of care delivered changes (e.g., new equipment is introduced or new procedures are performed).

10. Does the IPC program provide infection prevention education to patients, family members, and other caregivers?

Yes No Unknown Not Assessed

#### If YES:

10a. What topics are covered? (specify)

**10b.** How is this education provided (e.g., information included in the admission or discharge packet, videos, signage, in-person training)? (*specify*)

11. Does the facility have an interdisciplinary infection control committee to address issues identified by the IPC program?

Yes No Unknown Not Assessed

**Note:** Issues identified by the IPC program often impact multiple areas of the facility. An interdisciplinary committee, including facility leadership (e.g., ownership, chief medical officer, director of nursing), is needed to allocate resources and successfully implement long-term solutions.

#### If YES, specify:

11a. Who is part of the infection control committee? (select all that apply)

Chief Medical Officer Director of Nursing Environmental Services Unknown Not Assessed Other (specify):

11b. How often does the infection control committee meet?

Monthly	
Quarterly	
Unknown	
Not Assessed	
Other (specify):	

#### Notes

### Facility Demographics: Acute Care/Critical Access Hospital

		, entreal / leeess hospita		
1.	Facility Type: Hospital			
	Critical Access Hospital Long-term Acute Care Hospital			
2.	Is the facility part of an integrated healthcare system?			
	Yes No			
	<b>2a.</b> If yes, please specify the name of the	system:		
3.	Is the facility accredited?			
	Yes No			
IF V	YES:			
<u> </u>	<b>3a.</b> Specify the accreditation organizatio	ın.		
	The Joint Commission (TJC)			
	Det Norske Veritas Healthcare, In			
	Healthcare Facilities Accreditatio	n Program (HFAP)		
	Other (specify):			
	<b>3b.</b> Specify the date of last survey (mont			
4.	Patient Populations Served			
	Adult			
	Pediatric			
	Neonatal Obstetric			
	Other (specify):			
5.	Total Number of Licensed Beds:	_ 6. Current Census:	<b>7.</b> Average daily census in previous month:	
8.	Which types of units are in the facility or pa	art of the campus? (select all tha	at apply)	
Emergency Department Hemodialysis unit				
	Trauma Center, Specify level:			
	ICU (specify):			
	Medical			
	Surgical Neuro			
	Cardiac			
	Burn			
	Pediatric			
	Neonatal (specify levels): Other <i>(specify</i> ):
