WISQARS Data Visualization Intro Training: Narrative/Audio Description

Descriptive Text: CDC Logo. CDC Logo zooms out.

Text on Screen: Welcome to WISQARS Data Visualization. This
                                           tool displays fatal and nonfatal injury data in an
                                           interactive, visual format. You can use data
                                           from this tool to learn more about the public
                                           health burden associated with unintentional
                                           and violence-related injuries within the United
                                           States.

Descriptive Text: Music playing in the background. Animated text
                                           and video. Logo for WISQARS. Image of
                                           Computer appears.

Text on Screen: Select "I Agree" to access the website.

Descriptive Text: Orange box appears around "I Agree" button.

                                           Orange box around Explore Data.

Text on Screen: Today we are going to explore the filter
                                           function. This feature allows you to search for
                                           specific information relevant to your needs.

Descriptive Text:
                                           Orange box around Filter Data button.

                                           Filter Data Dashboard pop-up appears with
                                           multiple categories to filter from.

Text on Screen: The Filter Dashboard provides a list of some of
                                           the variables and demographics you can use to
                                           filter the data. Let's select Unintentional for
                                           Intent of Death and Fall for Mechanism of
                                           Death.

Descriptive Text:

                                           Orange box appears around Unintentional
                                           Checkbox and Fall Checkbox. Orange box
                                           around Apply Filters Button.

                                           Orange box around Filters: Unintentional Fall
                                           Deaths in top-left corner.

Text on Screen:	Scroll to see the injury-related death statistics for unintentional falls; a map of injury-related deaths and distribution by sex , age, race, and ethnicity.
Descriptive Text:	Orange header around U.S. Map of Injury-Related Deaths. Orange header around Distribution by Sex. Orange header around Distribution by Age. Orange header around Distribution by Race and Ethnicity.
Text on Screen:	We can also assess trends over time in unintentional falls. These trend line graphs are available by selecting the trends button.
Descriptive Text:	Orange header around Trends button.
Text on Screen:	Scroll down to view the Distribution by Sex trend chart.
Descriptive Text:	Orange header around Distribution by Sex.
Text on Screen:	You can scroll down further for trend lines for additional categories including age and race/ethnicity.
	Hover over the data points on a trend line to see more details.
Descriptive Text:	Orange box around multiple data points.
