

GNR Stool Pathogens Lactose Positive Flowchart

* = See Biochemical Tests for Gram Negative Organism ID Job aid for positive and negative result reference.

1 = MUG test can be performed. Pick at least four sorbitol (-) colonies and sub to BAP. If MUG is negative, screen using O157 latex agglutination. Confirm ID. If MUG is positive, ID as *E. coli*. (rare strains of O157 are MUG positive)
