INTRODUCTION TO LABORATORY RISK MANAGEMENT (LRM)

DESCRIPTION

Introduction to Laboratory Risk Management (LRM) is the first in a series of courses focused on developing risk management strategies for laboratory settings. This basic level eLearning course provides information on applying risk management principles and briefly describes related practices to emphasize the importance of risk management in laboratory settings. Topics covered include risk management goals, terminology, processes, and associated activities.

AUDIENCE

This online course is designed for new or existing public health and clinical laboratory professionals who handle potentially hazardous materials.

SPECIAL NEEDS

Course content is closed-captioned, where applicable, and optimized for a screen reader.

FREE REGISTRATION

- Locate the course online at www.cdc.gov/labtraining.
- Follow the link to register for the course in TRAIN.
- If you have difficulty with the online registration process, please email labtraining@cdc.gov.

CONTINUING EDUCATION

The Centers for Disease Control and Prevention Division of Laboratory Systems is approved as a provider of continuing education programs in the clinical laboratory sciences by the ASCLS P.A.C.E.® Program. This course is approved for 1.0 contact hour(s) of P.A.C.E.® credit. P.A.C.E.® number: 288-006-21.

INTRODUCTION TO LABORATORY RISK MANAGEMENT (LRM)

OBJECTIVES

At the conclusion of this course, the learner will be able to:

- Recognize the importance and benefits of risk management.
- Define terms associated with risk management.
- List the major processes in risk management and associated activities.
- Identify the importance of ensuring dynamic continual improvement.
