

Barbara Mahon, MD, MPH

Dr. Mahon received her MD and clinical training in pediatrics from the University of California, San Francisco and her MPH from the University of California, Berkeley. She trained in CDC's Epidemic Intelligence Service (EIS). Dr. Mahon is deputy chief of the Enteric Diseases Epidemiology and Surveillance Branch at the Centers for Disease Control and Prevention (CDC). The branch is responsible for national surveillance for enteric diseases. It conducts epidemiologic studies of the burden, trends, and food source attribution of foodborne diseases caused by *Listeria*, *Salmonella*, and *E. coli* O157, among other pathogens. The branch's work also focuses on vulnerable populations, including older adults, young children, and other groups, with the goal of creating knowledge needed to protect people by preventing disease. Dr. Mahon has a broad background in infectious disease epidemiology, having worked on foodborne diseases, vaccine-preventable diseases, and sexually transmitted diseases in academic and industry positions as well as in government.
