# CDC Building 23

The CDC Building 23 laboratory facility will complete the replacement of all outdated CDC biological laboratories, including the oldest laboratory buildings on CDC's main campus.

Building 23 will enhance CDC's research on malaria, parasitic diseases, *Salmonella*, and *E. coli*, maintain PulseNet (the national DNA "fingerprint" library of foodborne diseases) and support AIDS research.

**Size:** 16 stories, 730,000 Square Feet

During its construction time frame, Bldg 23 was the second largest construction project underway in Atlanta.

**Total Project Budget** (*planning, design, construction, and equipment*): \$365,336,000

## Features

- Space for 472 Laboratory and Lab Support Personnel
- Energy Efficient Research Labs
- Natural Day Lighting

**Project awarded:** March 2005

## Construction Duration:

November 2009–April 2010

**Design-Builder:** Turner Construction Company & CUH2A

May 28, 2010
