

J. Todd Weber, MD, Incident Manager of the Multistate Meningitis Outbreak and Chief of the Prevention and Response Branch of the Division of Healthcare Quality Promotion, US Centers for Disease Control and Prevention. The branch investigates and responds to emerging infections and related adverse events among patients and healthcare personnel. Prior to this position, he was assigned to the European Centre for Disease Prevention and Control in Stockholm, Sweden for four years where he worked principally on pandemic influenza preparedness, as well as healthcare associated infections and antimicrobial resistance. During his 22 years at CDC, Dr. Weber has held various positions, including Director, Office of Antimicrobial Resistance in the Coordinating Center for Infectious Diseases and has worked in the divisions of Bacterial and Mycotic Diseases, Sexually Transmitted Disease Prevention, and the Division of HIV/AIDS Prevention. He is a Fellow in the American College of Physicians and the Infectious Diseases Society of America.
