

Where do norovirus outbreaks from food contamination happen?

SOURCE: CDC National Outbreak Reporting System, 2009-2012

How contagious is norovirus?

Just a **very small amount** - as few as 18 viral particles - of norovirus on your food or your hands can make you sick.

That means the amount of virus particles that fit on the head of a pin would be enough to infect **more than 1,000 people!**
