Children, adolescents, or young adults who develop certain symptoms after having COVID-19 might have MIS-C. They should see a doctor if they had COVID-19, or have been in close contact with someone who had COVID-19, within the past 6 weeks and now have the following:

**Ongoing Fever**  
**PLUS more than one of the following:**

- Stomach Pain
- Diarrhea
- Vomiting
- Skin Rash
- Blood Shot Eyes
- Dizziness or Lightheadedness

Go to the nearest hospital Emergency Room if your child is showing any severe MIS-C warning signs such as:

- Trouble breathing  
- Pain or pressure in the chest that does not go away
- Confusion or unusual behavior  
- Severe abdominal pain  
- Inability to wake or stay awake
- Pale, gray, or blue-colored skin, lips, or nail beds; depending on skin tone
