

**Immediate Closures and Violations Identified During Routine Inspections of
Public Aquatic Facilities — Network for Aquatic Facility Inspection Surveillance,
Five States, 2013
WB2735**

PROGRAM DESCRIPTION: The goal of this report is to highlight how inspection-outcome data, which are collected using a standardized form during inspection of a public aquatic facilities, can be regularly analyzed and interpreted to inform program planning, implementation, and evaluation of public health practice

OBJECTIVES:

At the conclusion of the session, the participant will be able to:

- (1) describe how aquatic inspection data can be used as surveillance data
- (2) identify inspection elements deemed most critical to preventing aquatic facility–associated illness and injury
- (3) describe the vital role environmental health practitioners play in preventing aquatic facility–associated illness by conducting inspections
- (4) identify ways to optimize inspection-outcome data

FACULTY/

CREDENTIALS:

Michael J. Beach, PhD, Division of Foodborne, Waterborne, and Environmental Diseases, National Center for Emerging and Zoonotic Infections Diseases, CDC
