

## QuickStats

FROM THE NATIONAL CENTER FOR HEALTH STATISTICS

### Percentage\* of Adults Aged $\geq 18$ Years Who Reported Having a Severe Headache or Migraine in the Past 3 Months,<sup>†</sup> by Sex and Age Group — National Health Interview Survey,<sup>§</sup> United States, 2015

\* With 95% confidence intervals indicated with error bars.

<sup>†</sup> Based on a positive response to the question “During the past 3 months, did you have a severe headache or migraine?”

<sup>§</sup> Estimates are based on household interviews of a sample of the civilian, noninstitutionalized U.S. population and are derived from the National Health Interview Survey Sample Adult component.

In 2015, 20.0% of women and 9.7% of men aged  $\geq 18$  years had a severe headache or migraine in the past 3 months. Overall and for each age group, women aged  $\geq 18$  years were more likely than men to have had a severe headache or migraine in the past 3 months. For both sexes, a report of a severe headache or migraine in the the past 3 months decreased with advancing age, from 11.0% among men aged 18–44 years to 3.4% among men aged  $\geq 75$  years and from 24.7% among women aged 18–44 years to 6.3% among women aged  $\geq 75$  years.
