WHAT TO WEAR BEFORE ENTERING A HOME OR BUILDING WITH MOLD DAMAGE

Goggles or eye protection
N-95 respirator or one that provides even more protection (check packaging for “N-95”)
Long-sleeved shirt
Protective gloves
Long pants
Waterproof boots

CAUTION!
If you have a breathing problem like asthma, do not enter a building with mold damage. Mold can make asthma symptoms worse.

If you have a weakened immune system (such as from cancer treatment or medicines that suppress the immune system), do not enter a building with mold damage. People with a weakened immune system are more likely to get a serious illness from mold.

Children should also not enter buildings with mold damage.
