American Indians (AI) and Alaska Natives (AN) have the highest rate of motor vehicle-related deaths compared with other Americans.

More than half of AI/AN who died in motor vehicle crashes were not buckled up.

Wear a seat belt, in every seat, every time you ride in a car.
- Never use a seat belt to buckle up more than one person.
- Never ride in the bed of a truck.
- Wear a seat belt throughout pregnancy.

AI/AN infants have a motor vehicle-related death rate 8X higher than non-Hispanic white infants.

Always buckle children in age- and size-appropriate car seats, booster seats, and seat belts.
- Find the right car seat or booster seat for your child’s age, height, and weight.
- Properly buckle children aged 12 and under in the back seat.
- Never use traditional baby carriers (such as cradleboards) in place of a car seat.

2 in 3 crashes on reservations are related to drunk driving.

Keep yourself, your loved ones and your community safe from drinking and driving.
- Choose not to drink and drive.
- Get a ride if you drink.
- Stop friends from drinking and driving.
