

How does your state compare?

States in Your Region		
	Total population in 2013	Crash-related death costs in 2013
Wyoming	0.6M	\$127M
North Dakota	0.7M	\$162M
South Dakota	0.8M	\$177M
Utah	2.9M	\$268M
Montana	1.0M	\$299M
Colorado	5.3M	\$647M

The cost figures presented in the fact sheets are based on information collected by each individual state. As a result, there are differences between states in the way they collect and categorize these data.

Prevention Saves Money

The **best way** to reduce motor vehicle crash costs is to prevent crashes.

Some effective strategies for preventing crashes include:

- graduated driver licensing systems,
- sobriety checkpoints, and
- ignition interlocks for those convicted of driving while intoxicated.

The **next best way** to reduce costs is to prevent injuries when crashes do happen.

Among the proven ways to prevent injuries during a crash are increasing:

- car seat and booster seat use through distribution plus education programs,
- car seat and booster seat use through updated laws that require car seat or booster seat use for children age 8 and under, and
- seat belt use through primary seat belt laws for all seating positions.

For more information about these programs and policies, visit: www.cdc.gov/motorvehiclesafety.

Where can I get more cost estimates?

- CDC offers a new interactive calculator, called the Motor Vehicle PICCS (Prioritizing Interventions and Cost Calculator for States). This tool was designed to help decision makers prioritize and select from a suite of 14 effective motor vehicle injury prevention interventions. At the state level, MV PICCS calculates the expected number of injuries prevented and lives saved and the costs of implementation, while taking into account available resources. www.cdc.gov/motorvehiclesafety/calculator

- CDC's Web-based Injury Statistics Query and Reporting System (WISQARS) is an online, interactive system that provides reports of injury-related data. To find the costs of various injury deaths and nonfatal injuries, visit: www.cdc.gov/injury/wisqars.
