Disability Impacts ALL of US

Each of us may experience a disability in our lifetime.

CDC’s National Center on Birth Defects and Developmental Disabilities supports efforts to include adults with disabilities in disease prevention, health promotion, and emergency response activities, while working to remove barriers to health care and improve access to routine preventive services.

A Snapshot of Disability in Missouri

This fact sheet provides an overview of disability in Missouri (MO) compared to national estimates. You can use this information to learn more about the percentages and characteristics of adults with disabilities in Missouri.

Disability Costs in Healthcare Expenditures

$8.9 billion per year*

in Missouri

Despite progress, adults with disabilities in Missouri and across the country continue to experience significant differences in health characteristics and behaviors compared to adults without disabilities.

Adults with Disabilities are more likely to

- be inactive
  - Adults with disabilities in the U.S.: 43.0%
  - Adults without disabilities in the U.S.: 24.3%
  - Adults with disabilities in Missouri: 45.1%
  - Adults without disabilities in Missouri: 24.6%

- have high blood pressure
  - Adults with disabilities in the U.S.: 42.9%
  - Adults without disabilities in the U.S.: 26.8%
  - Adults with disabilities in Missouri: 44.5%
  - Adults without disabilities in Missouri: 25.1%

- smoke
  - Adults with disabilities in the U.S.: 30.6%
  - Adults without disabilities in the U.S.: 14.6%
  - Adults with disabilities in Missouri: 36.9%
  - Adults without disabilities in Missouri: 17.4%

- be obese
  - Adults with disabilities in the U.S.: 39.6%
  - Adults without disabilities in the U.S.: 25.3%
  - Adults with disabilities in Missouri: 40.3%
  - Adults without disabilities in Missouri: 26.8%
