Disability Impacts ALL of US

Each of us may experience a disability in our lifetime.

CDC’s National Center on Birth Defects and Developmental Disabilities supports efforts to include adults with disabilities in disease prevention, health promotion, and emergency response activities, while working to remove barriers to health care and improve access to routine preventive services.

A Snapshot of Disability in Tennessee

This fact sheet provides an overview of disability in Tennessee (TN) compared to national estimates. You can use this information to learn more about the percentages and characteristics of adults with disabilities in Tennessee.

Disability Costs in HEALTHCARE EXPENDITURES

Despite progress, adults with disabilities in Tennessee and across the country continue to experience significant differences in health characteristics and behaviors compared to adults without disabilities.

Adults with Disabilities are more likely to

- be inactive
  - Adults with disabilities in the U.S.: 43.0%
  - Adults with disabilities in Tennessee: 56.9%
  - Adults without disabilities in the U.S.: 24.3%
  - Adults without disabilities in Tennessee: 31.9%

- have high blood pressure
  - Adults with disabilities in the U.S.: 42.9%
  - Adults with disabilities in Tennessee: 49.6%
  - Adults without disabilities in the U.S.: 26.8%
  - Adults without disabilities in Tennessee: 30.4%

- smoke
  - Adults with disabilities in the U.S.: 30.6%
  - Adults with disabilities in Tennessee: 44.2%
  - Adults without disabilities in the U.S.: 14.6%
  - Adults without disabilities in Tennessee: 18.2%

- be obese
  - Adults with disabilities in the U.S.: 39.6%
  - Adults with disabilities in Tennessee: 36.4%
  - Adults without disabilities in the U.S.: 25.3%
  - Adults without disabilities in Tennessee: 28.5%

* Disability-associated healthcare expenditures are presented in 2006 dollars as reported in Anderson et al, 2010. This value represents approximately 29% of total healthcare expenditures for the state of Tennessee.

** In 2013 and 2014, the Behavioral Risk Factor Surveillance System (BRFSS) did not ask participants about deafness or serious difficulty hearing; however, BRFSS began collecting this information in 2016.
