Over 385,000 People Reached Through Outreach Campaigns

Kentucky’s Division of Developmental and Intellectual Disabilities

This project was funded under CDC cooperative agreement CDC-RFA-DD16-1603: Improving the Health of People with Mobility Limitations and Intellectual Disabilities through State-based Public Health Programs. The findings and conclusions in this report are those of the authors and do not necessarily represent the official position of the Centers for Disease Control and Prevention.
Intervention: Disability & Health, Universal Design in Health

- **Purpose of Intervention:** increase the number of training sites where professionals and community members are trained to facilitate the implementation of inclusive strategies
  - **Target Population:** health professionals & community members
  - **Reach:** 51 trainings to over 2650 individuals in 3 years
  - **Collaborations:** local, state, and national organizations

- **Measurable Outcomes:**
  - 95% agreed or strongly agreed:
    - “The training content increased my awareness on health disparities and inequality.”
    - “The training increased my knowledge on strategies that will promote health inclusion for individuals with varying mobility and cognitive limitations.”
